Code for Sustainable Homes (November 2010) Design - Draft

Total CO₂ emissions

Net CO₂ emissions

Additional allowable generation and its CO2 emissions offset

CO₂ emissions offset from additional allowable generation

CO₂ emissions offset from community biofuel CHP systems

This report details the calculations and results for Ene 1, 2 and 7 of the Code For Sustainable Homes.

This Design Assessment has been carried out using Approved SAP software. It has been prepared from plans and specifications and may not reflect the property as constructed. Code calculations are from the Technical Guide (November 2010).

Assessor name	Mr Philip French		Assessor number	6	587	
Client			Last modified	2	9/03/2013
