Dear Madam

THE ENVIRONMENTAL INFORMATION REGULATIONS 2004 - ENVIRONMENTAL ENQUIRY

Premises: HAYMARKET PUBLISHING, TEDDINGTON STUDIOS, BROOM ROAD, TEDDINGTON, MIDDLESEX TW11 9BE

As requested, a search has been made for information on the above premises. A thorough search of current and historical files and databases has revealed no petroleum tank information for the site.

Please note that this report is restricted to matters currently known by the London Fire and Emergency Planning Authority. Although we hold extremely comprehensive records, it is possible that we do not hold any records whatsoever for some solid-filled and very old tanks. This will be for one of the following reasons:-

- The records held by this Authority were passed to it from the Greater London Council in 1986. In 1965 the Greater London Council inherited petroleum related records from the London County Council and the outer London Boroughs / Councils. Some of the outer London records were incomplete.
- 2. For premises where petroleum tanks have been either removed or permanently made safe, the Authority's records have (in a minority of cases) been destroyed; and for these cases the Authority does not hold any records that indicate that there was ever a 'petroleum' interest at the premises.

As you are aware, a fee is levied for the provision of this information and payment should be made in accordance with the invoice, which will be sent under separate cover.

Any queries regarding this letter should be addressed to the Petroleum Group Admin Manager. If you are dissatisfied in any way with the response given, please ask to speak to the Team Leader quoting our reference.

Yours faithfully,

Barry Walford

for Assistant Commissioner (Fire Safety Regulation)

Fire and Community Safety Directorate petroleum@london-fire.gov.uk

02 October 2013

Dear Fatima,

RE: Teddington Studios, Broom Road, Teddington.

Thank you for your recent letter and subsequent payment requesting information on the past land use and development of the subject property. As the subject site is within 100m of the Borough boundary our comments only relate to land within our Borough. Further information may be available from the Royal Borough of Kingston. I have undertaken a review of the information we currently hold and am able to comment as follows:

 We hold no records of any current or former landfill sites within 500m of the subject site. However, in view of the history and redevelopment of the site there is likely to be a degree of made ground present.

In addition to the above there are records of a possible pre-licensed landfill site located approximately 990m southeast of the subject site. We do not hold any further information relating to this site.

- We currently know of no specific issues, records relating to gas emissions or contamination either on or adjacent to the subject site.
- 3. We hold no records of any pollution or contaminated incidents having occurred either on or adjacent to the subject site. To our knowledge, the Council has not currently served or resolved to serve a remediation notice under section 78E of the Environmental Protection Act 1990 in relation to the subject property or any adjoining or adjacent land. The site has currently not been identified as contaminated as defined by Part 2A of the Environmental Protection Act 1990.

- 4. This section holds records of above ground storage tanks located on the site as well as at least one electricity substation, there are no further details held. In addition there is a 'Film Production Works' located adjacent to the southeast of the site between approximately 1930 until 1950. There have currently not been any designations as 'Special Sites'
- 5. There are no authorised processes either on or adjacent to the site.
- 6. This section does not hold any records of private water abstractions within 500m of the subject site.
- 7. This section is not aware of any problems with asbestos / radon / or radioactivity at the subject site. However, in view of the ages of the buildings on the site it is likely that asbestos is present on site.
- 8. This section is not aware of any Private Water Abstractions within 2km of the subject site.

I hope that the above information is of use to you. Thank you for your payment of £108 as payment for our services.

Kind Regards,

SN

Thomas Hindley
Scientific Officer
Environment Directorate
London Borough of Richmond upon Thames

Tel: 0208 891 1411

E-mail: t.hindley@richmond.gov.uk

The London Borough of Richmond upon Thames has provided the above factual information based upon data currently available to the Council. This data set is not yet complete and is constantly being updated and reviewed. Therefore, the information given above may be subject to change in the future upon the receipt of additional information.

Introduction

The Environment Act 1995 has made site sensitivity a key issue, as the legislation pays as much attention to the pathways by which contamination could spread, and to the vulnerable targets of contamination, as it does the potential sources of contamination. For this reason, Landmark's Site Sensitivity maps and Datasheet(s) place great emphasis on statutory data provided by the Environment Agency and the Scottish Environment Protection Agency; it also incorporates data from Natural England (and the Scottish and Welsh equivalents) and Local Authorities; and highlights hydrogeological features required by environmental and geotechnical consultants. It does not include any information concerning past uses of land. The datasheet is produced by querying the Landmark database to a distance defined by the client from a site boundary provided by the client.

In the attached datasheet the National Grid References (NGRs) are rounded to the nearest 10m in accordance with Landmark's agreements with a number of Data Suppliers.
