Dear Mr Goodwin

### **Teddington Riverside – Internal Daylight and Sunlight**

As you are aware this practice has provided detailed daylight and sunlight advice in respect of the Teddington Riverside proposals. We have previously issued full daylight and sunlight studies for the scheme dated February 2014 and an updated and expanded report dated June 2014 providing additional details and widening the scope of our assessments in response to comments received from the Local Authority following the Building Research Establishment's (BRE) technical review the February 2014 study.

Further to our updated June 2014 report further comment was provided to the Borough by the BRE in their letter of July 10th. The bulk of the BRE response relates to internal daylight and sunlight provision within the proposed units and, in particular, focuses upon the internal daylighting provision. Such focus on 'diffuse daylight' is usual as it is this ambient light, as opposed to direct incidence of sun on a window, which provides the amenity required for visual discrimination and dictates whether a space is considered adequately lit or gloomy.

At the outset the exceptionally high compliance rate of the submitted scheme with the internal daylighting targets should be noted. The BRE response recognises that it is appropriate to consider the 1.5% ADF target for Living / Kitchen / Diner arrangements due to focus on daylighting to the main living space. Based on these criteria all bedrooms achieve the target 1.0% ADF and only 7 L/K/D's, of more than 750 rooms assessed, fall slightly below the BRE notwithstanding the limitations often encountered when providing private balcony amenity space.

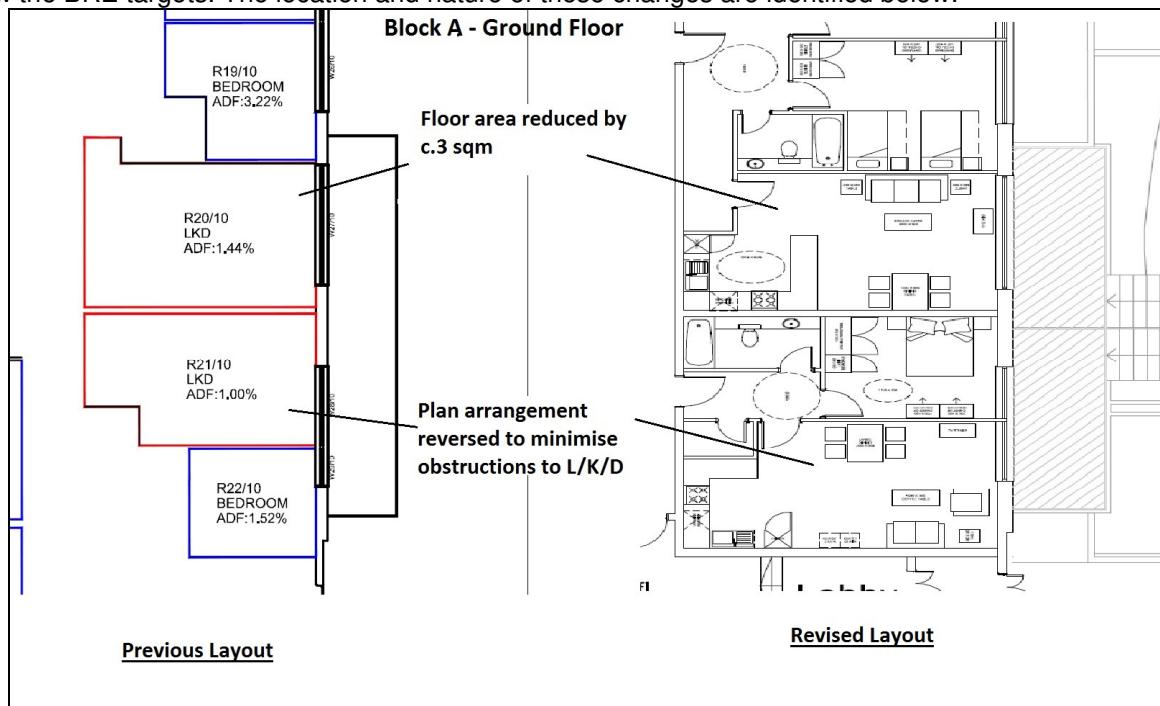

This exceptionally high degree of over 99% compliance recognises the overall quality of the design and the attention to detail, maximising glazing in sensitive areas and offsetting balconies to avoid internal daylight levels been compromised. Indeed the BRE targets recognise that the provision of balconies is often a trade-off with internal daylight provision. When a 'without balconies' position is considered the scheme fully complies with the BRE guidance when a 1.5% target is applied for L/K/D's.

### **Scheme Amendments**

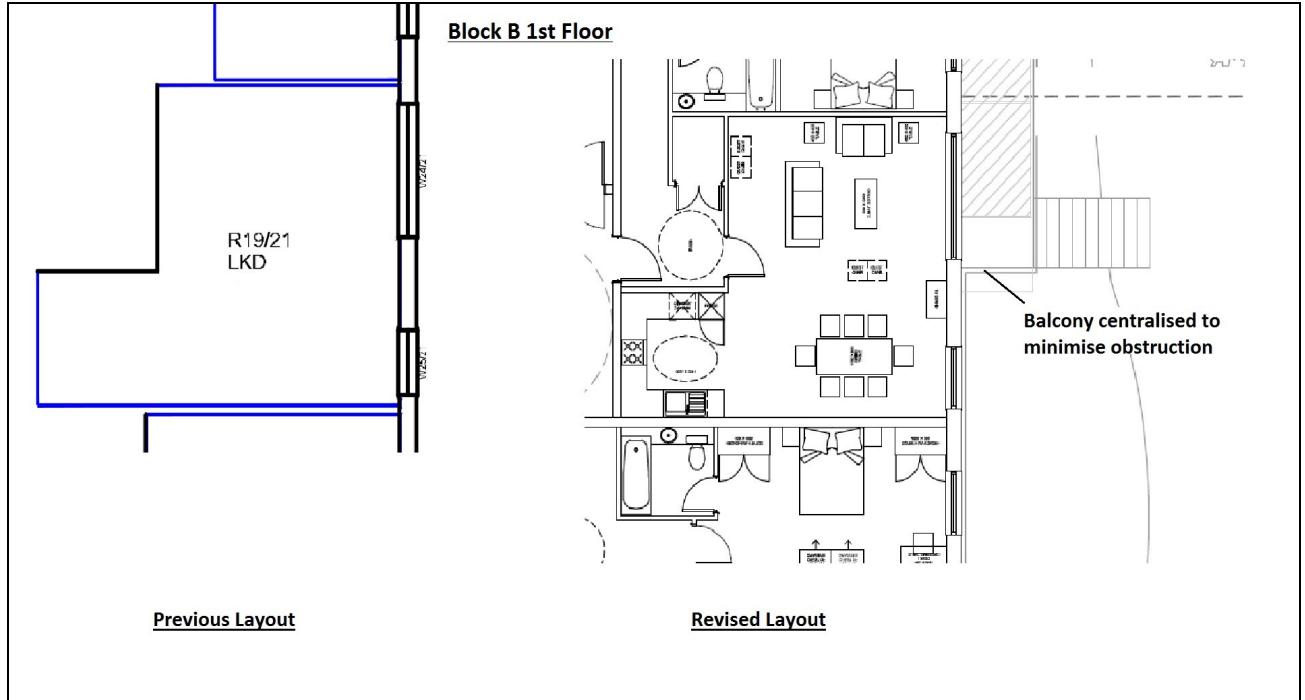

Despite the very high level of internal daylighting compliance the BRE report identified the 7 rooms where daylight levels fall below the BRE targets. TP Bennett have made a number of further amendments which are summarised in the table below:

Room Reference	Location (Block / Floor)	Changes	Previous ADF	Revised ADF following amendments
R20 / 10	Block A / Ground	Floor area reduced by c. 3sqm	1.44	1.56
R21 / 10	Block A / Ground	Plan form reversed to limit obstructions and room area reduced	1.00	1.67 (Room reference amended to R22/10)
R19 / 21	Block B / 1 <sup>st</sup>	Balcony Centralised to limit obstruction to L/K/D	1.07	1.59
R9 / 41	Block C / 1 <sup>st</sup>	Floor area reduced by c. 4 sqm	1.35	1.45 (1.5 when rounded to 1 decimal place)
R17 / 41	Block C / 1 <sup>st</sup>	Plan form reversed to limit obstructions	1.12	1.97 (room reference amended to R15/42)
R17 / 42	Block C / 2 <sup>nd</sup>	Plan form reversed to limit obstructions	1.2	3.66 (room reference amended to R15/42)
R12 / 30	Block D / Ground	No Change – room compliant when rounded to 1 decimal place	1.47	1.5

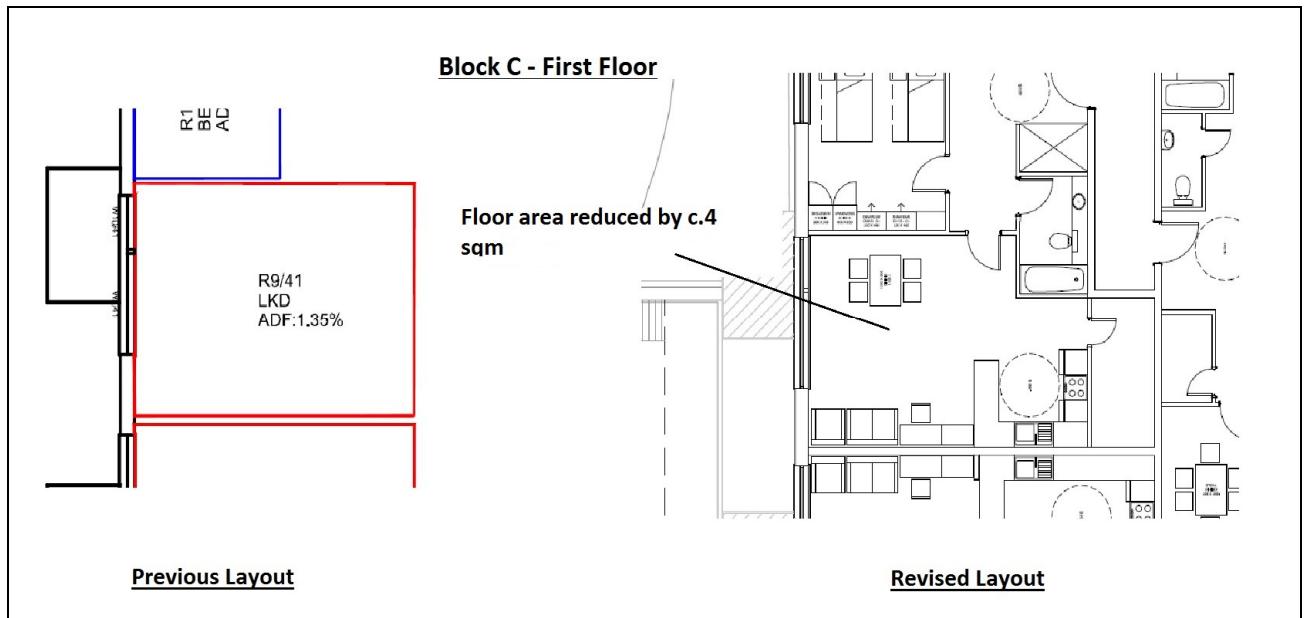

The further design changes maximise the daylighting potential to the localised units which previously fell below the BRE targets. The location and nature of these changes are identified below:

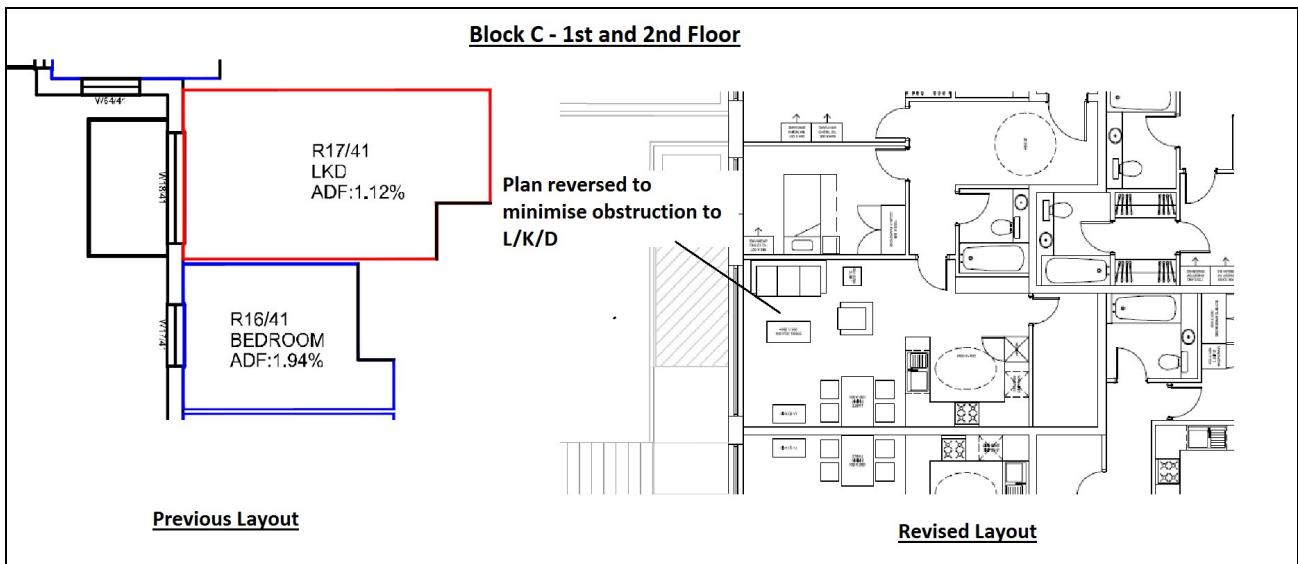

**Figure 1: Block A Ground Floor Amendments**

**Figure 2: Block B 1<sup>st</sup> Floor Amendments**

**Figure 3: Block C 1<sup>st</sup> Floor Amendments**

### Block C – 1<sup>st</sup> and 2<sup>nd</sup> Floor Amendments

The design changes further maximise the daylighting potential to the affected units such that they will exceed or be within an unnoticeable level of tolerance to the BRE targets. A full set of revised internal daylight results, including the effects of balconies, is appended to this letter. Taken in the wider context this full compliance with the BRE targets is an excellent level of amenity for a scheme of this nature. The excellent daylight levels are indicative of the overall quality and considered nature of the design and is wholly in line with the BRE guide and policy DM DC 5 of the London Borough of Richmond Development Management Plan.

#### Direct Sunlighting

In respect of direct sunlighting to the windows of the units the BRE document notes the inherent constraints in achieving direct sunlight to windows that are east and west facing.

The BRE review acknowledges that improved levels of sunlighting may be achieved to south facing rooms however the opportunities to orientate blocks to be south facing without compromising other aspects of design are limited. As noted in our report, the site layout has been designed to maximise all aspects of amenity with the result that the principal orientation of the blocks runs north-south away from the river. An alternative west-east orientation would increase south facing units but similarly lead to a large area of north facing facades and significant shading to the amenity areas within the site. The BRE report notes that the balconies of the units will receive good levels of amenity and suggests that constraints in respect of direct sunlight to the rooms should be weighed against the merits of the scheme and, we would suggest, the overall high quality of the design. A key element illustrating this overall quality is the exceptional level of compliance in respect of the principle consideration of diffuse daylighting as well as the quality of amenity provided to both private balcony amenity space and the communal landscaped areas. Overall the quality of both daylight and sunlight amenity is considered to be excellent when considered against the site context, layout and factors influencing the design. Again the design is wholly in line with the BRE guide and policy DM DC 5 of the London Borough of Richmond Development Management Plan.

I trust that the above is useful in illustrating the further design responses to the BRE's latest comments and overall excellent amenity levels provided by the scheme. Should you have any queries do get in touch.

Yours sincerely

A handwritten signature in black ink, appearing to read "J.A. Lonergan".
