4.7 Landscaping

Currently the pavement along Rugby Road is quite narrow and runs parallel with the existing stadium boundary fence. It is a mix of paving slabs and Tarmac, the latter being the prominent material.

The proposal widens the publically open area and upgrades the surface finish from the Tarmac to the paving slab finish which will run to the new enclosure line. Generally there is a reduction in Tarmac and an increase in paving

to enhance the overall look and feel of the area at ground floor level.

4.8 Museum relocation

In order to enhance the visitor experience we have proposed to move the Rugby Museum to the south west corner of the stadium, where it was initially intended under the south stand proposals, which will enable visitors to directly enter the museum off the street. This will ease the visitor experience. At present, museum visitors need to report to the store off Whitton Road before being escorted through the grounds to the museum. The new proposal will allow people to drop in off the street and negate the need to pre-book and get escorted to the east stand for the museum experience.

Proposed

Programme

- Existing Museum to be vacated 12th March 2017
- Approx. 12 week construction period
- Continuous operation will rely on commencing new fit-out in November 2016
- Opportunity to proceed with works from August 2016 to complete for NFL/ Autumn Internationals 2016
- o Design of new Museum facility March – May 2016
- o Appointment of Contractor mid-June 2016

Access

5.1 Accessibility of the stadium

Twickenham Stadium is on the northern side of the A316 into London. As Twickenham stadium lies in a residential and commercial area the surrounding roads are resident permit holders only and the RFU discourage parking outside of their designated areas. Demand for match day parking is high and must be booked in advance. The RFU issue a number of free parking spaces for all international matches through priority wheelchair access.

encountered and this project gives us the opportunity to address issues that would not have otherwise been easy to address in the stadium in its current configuration.

Car parks are located to the North and West of the stadium. There are a number of designated car parks. These are the Rosebine Avenue car park located next to Harlequins RFC, Tesco car park off Mogden Lane, Cardinal Vaughan car park, the North car park and the West car park.

Shuttle buses from nearby train stations stop adjacent to the stadium on Rugby Road. Buses 281, 267 and H22 all run regular services which pass close to the stadium. Alternatively, take a 33, R68, R70, 290 or 490 bus to Twickenham town centre (King Street) – the stadium is a 10 to 15 minutes' walk away.

KSS has worked extensively with movement consultants and transport consultants to arrive at the best solution to improve the existing stadium in and around the site by foot and by vehicle. Extensive analysis throughout the early design process has enabled the design to address many of the previous problems

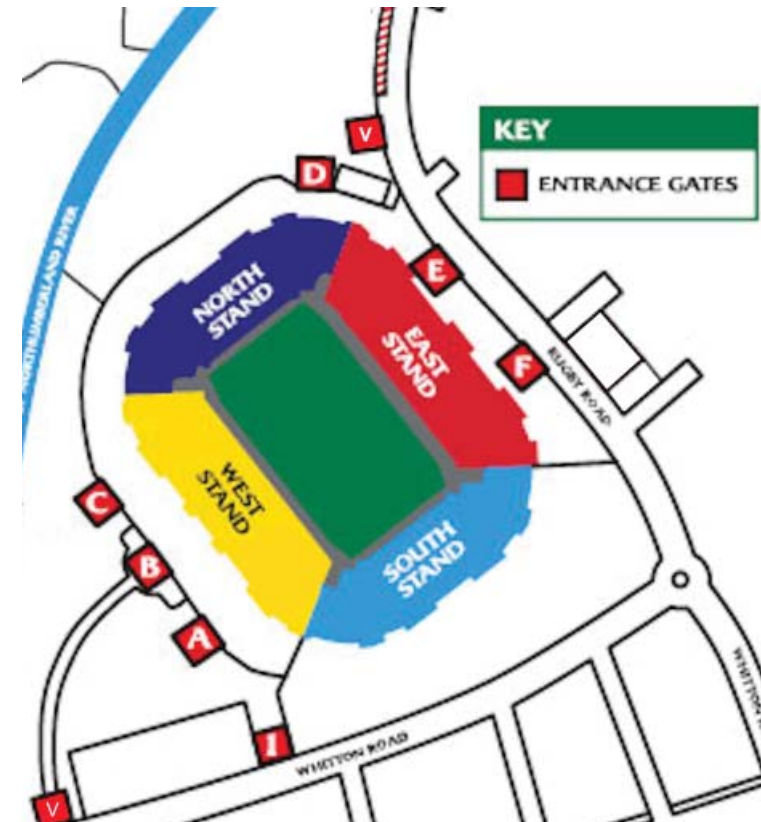

Diagram highlighting access to the stadium, including turnstiles (A to F) and vehicular access (V). Vehicular access not in use prior or immediately after games.

Plan showing turnstiles and main lifts around the stadium.

5.2 Vehicular access

It is important to note that there will be no increase in spectator numbers visiting the site on match days as the stadium capacity is not increased.

Vehicles enter the site off Rugby Road from the north of the stadium adjacent to the current site workshop. An outer ring road takes vehicles to either a large north car park or around to the west car park which is a public facility on non-match days. General vehicle access off Whitton Road is not available however, a set of double gates are in place to assist vehicle movements managed by the RFU on and around match and event days.

There is a drop off point in the south east corner of the site off Rugby Road that serves the hotel and gym.

Currently, all visiting vehicles arrive via a barrier gate operated by staff within an adjacent security hut located to the north of the site at gate D.

Lions gate access off the west car park is managed by the RFU and is currently only opened on match days for the team coach to drop players outside the gates where they walk in to the changing rooms within the west stand.

During an event vehicular access will be limited to emergency vehicles only. Deliveries will be on non-match days through gate D and around the outer concourse.

Refer to Momentum Transport Statement for details of traffic impact of the new development.
