

In the south-east quarter was a flower garden and winding paths through tree and shrub planting leading to two grottoes, of which one remains today albeit now lacking its woodland setting.

South-east Quarter

Key considerations and opportunities for this area:

- Improve landscape setting of the grotto, to be informed by outcome of archaeological investigation in March and July 2017.
- Restore flower garden in the upper section of this quarter
- Improve habitats and biodiversity to promote access to nature.
- Reintroduce gravel path network within the Flower Garden.
- Reinterpret the Flower Garden.
- Coppice existing yews and holly to regenerate planting stock.
- Create evergreen enclosures and hedging.
- Remove dilapidated timber palisade fencing.
- Explore opportunities for managed extensive volunteer tree planting projects.

Key:

- Existing tree canopy
- Proposed avenue trees
- Proposed orchard trees
- Proposed specimen trees
- Proposed grove trees
- Proposed hedges
- Amenity grassland
- Wetland habitats
- Wilderness
- Flower garden
- Thicket
- Existing paths
- Proposed 'wiggle' paths

1. Planted palisade
2. Reformed terraces
3. Ninepin alley
4. Enhanced Grotto setting
