1.0 Introduction

- 1.1 The Stilwell Partnership has been instructed by London Borough of Richmond upon Thames to undertake a Transport Statement to accompany a Planning Application for the proposed refurbishment of the Newhouse Centre, along Buckingham Road, Hampton, to accommodate 50 children with Special Educational Needs (SEN) and 22 members of staff. 25 of these children are currently accommodated at Clarendon School, Hampton and will be transferred to a separate building at this new site to better meet their needs.
- 1.2 The purpose of this study is to advise the Local Authority, London Borough of Richmond upon Thames of the Transportation Impact that the proposed development could have on the local highway network. Parking Surveys were undertaken in December 2016.
- 1.3 The general limitations of this assessment are that:
 - A number of data sources have been used in compiling this report. Whilst The Stilwell Partnership (TSP) believe them to be trustworthy; it is unable to guarantee the accuracy of the information that has been provided by others.
 - This report is based on information available at the time of preparation. There is potential for further information to become available, which may create a need to modify conclusions drawn in this report.
- 1.4 In **Section 2** we detail the Local and National Planning Policies; in **Section 3** we detail the site location in relation to the highway network and describe the existing development. **Section 4** outlines the development proposals. **Section 5** describes the results of the parking survey and **Section 6** outlines the results of a School travel survey. In **Section 7** the highway impact of the development is considered. **Section 8** details the sustainability of the site and **Section 9** concludes the report.

2.0 Planning Policy Context

TRANSPORT WHITE PAPER – CREATING GROWTH, CUTTING CARBON (JANUARY 2011)

- 2.1 Creating Growth, Cutting Carbon' sets out the Government's objectives for a greener and safer transport network that encourages economic growth and improves quality of life for communities.
- 2.2 The White Paper encourages the implementation of sustainable local transport systems and aims to remove the previous top-down approach to transport planning. Local Authorities will have the power to implement and tailor transport systems and schemes based on local needs and behaviour.
- 2.3 The economic aims of the White Paper can be achieved by increasing access to employment and services, reducing carbon emissions, increasing public transport accessibility, and as a by-product, increasing the number of people using safer transport methods with wider health benefits.
- 2.4 The White Paper notes the key role of travel planning in achieving the Government's objectives, as set out below:

"The Government wants to encourage and enable more sustainable transport choices. [...] In transport terms, this might be exemplified by reducing unnecessary signs, posts and other street clutter to improve road safety and encourage walking, by travel planning, or by presenting information in such a way as to encourage choice"
- 2.5 Successful travel planning schemes are noted and used as examples within the White Paper, including Travel Planning for Schools, Cycle Journey Planning and Area-Wide Travel Planning.

NATIONAL PLANNING POLICY FRAMEWORK (2012)

- 2.6 'On the 27th March 2012 the National Planning Policy Framework was published, which sets out the Government's planning policies for England. The new document is a key part of the Government's reforms to make the planning system less complex and more accessible, to protect the environment and to promote sustainable growth.
- 2.7 With regards to sustainable travel NPPF states:

Para 29

- 2.8 Transport policies have an important role to play in facilitating sustainable development but also in contributing to wider sustainability and health objectives. Smarter use of technologies can reduce the need to travel. The transport system needs to be balanced in favour of sustainable transport modes, giving people a real choice about how they travel. However, the Government recognises that different policies and measures will be required in different communities and opportunities to maximise sustainable transport solutions will vary from urban to rural areas.

Para 30

- 2.9 Encouragement should be given to solutions which support reductions in greenhouse gas emissions and reduce congestion. In preparing Local Plans, local planning authorities should therefore support a pattern of development which, where reasonable to do so, facilitates the use of sustainable modes of transport.

Para 32

- 2.10 All developments that generate significant amounts of movement should be supported by a Transport Statement or Transport Assessment. Plans and decisions should take account of whether:
- The opportunities for sustainable transport modes have been taken up depending on the nature and location of the site, to reduce the need for major transport infrastructure;
 - Safe and suitable access to the site can be achieved for all people; and
 - Improvements can be undertaken within the transport network that will cost-effectively limit the significant impacts of the development. Development should only be prevented or refused on transport grounds where the residual cumulative impacts of development are severe.

Para 36

- 2.11 A key tool to facilitate this will be a Travel Plan. All developments which generate significant amounts of movement should be required to provide a Travel Plan.

RICHMOND CORE STRATEGY – LOCAL PLAN,

- 2.12 The Core Strategy April 2009 is one of the documents that make up the Local Development Framework, the new development plan for the Borough. It will set out the Strategic Planning Framework for the Borough for the next 15 years. The Core Strategy will supersede the Strategic policies section of the Unitary Development Plan: First Review 2005. The Core Strategy takes account of other plans and strategies and will be the delivery mechanism for the spatial elements of the Community Plan.

- 2.13 With regards to The Core Strategy states:

The Spatial Strategy: 6.1 A Sustainable Future

Section 6.1.1:

- 2.14 As an outer London Borough there has always been considerable in and out commuting for work, education, shopping and leisure and this is likely to continue, even if residents are able to carry out most day to day activities locally. To reduce environmental impacts and congestion of such movement, public transport, cycling and walking networks will be improved and promoted, and major new development steered towards areas which have access to good public transport, such as Richmond and Twickenham.

Section 6.1.2:

- 2.15 To play their role in minimising climate change, measures such as retaining existing buildings where possible and practicable will be considered, but if redevelopment is necessary, sustainable construction and measures to minimise energy use and encourage the use of renewable energy to move towards carbon neutrality will be taken. Adverse impacts of new development will be minimised biodiversity protected and measure taken to ensure sustainable waste management.

2.16 **Section 8.1.5 5.G Sustainable Travel**

- Encourage major employers and schools to develop Green Travel Plans and require these where appropriate with planning applications.
- Require all major developments to submit a Transport Assessment based on TfL's Best Practice Guidance.
- Encourage efficient, safe and sustainable freight transport.
- Encourage river transport through the retention and support for new transport infrastructure.

Policy G13

GREEN TRAVEL PLANS

- 2.17 Planning applications for major travel generating developments will be expected to be accompanied by Green Travel Plans. In respect of other proposals, the Council will also require applications to be supported by a Green Travel Plan, aimed at delivering sustainable transport objectives. The circumstances in which these will be required are:
1. All major developments comprising jobs, shopping, leisure and services;
 2. Smaller developments comprising jobs, shopping, leisure and services which generate unsustainable travel in other locations;
 3. Proposals for new and expanded school facilities; and
 4. Where the Green travel plan will help to address a particular local traffic problem associated with a planning application, which might otherwise have to be refused on local traffic grounds.

Policy CF4

EXPANSION OF SCHOOLS

- 2.18 Planning permission will be granted for the expansion of schools providing:

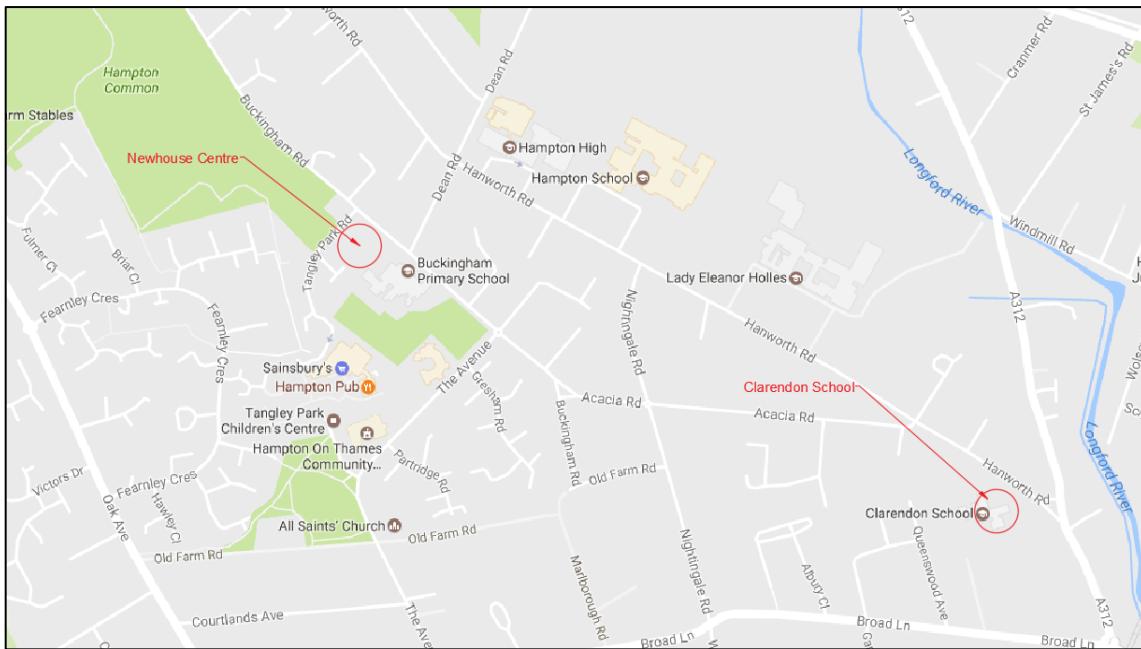

1. Proposals are in compliance with policy R5 protection of open space;
2. The proposed development would not detract from the character and appearance of existing buildings and the surrounding area;
3. There is agreement to the introduction and implementation of a schools green travel plan where appropriate;
4. The highway access, parking, turning and any increased traffic movements can be accommodated satisfactorily.

3.0 Site Location and Existing Development

Existing Site Description and Location

- 3.1 The site is situated in Hampton, South West London which is a suburban area in the London Borough of Richmond upon Thames. The site is situated just south of the junction of Buckingham Road and Tangle Park Road (TW12 3LT) as shown in **Figure 1** below.

Figure 1 – Site Location Plan

Source: Google

- 3.2 The London Borough of Richmond is implementing a number of changes that will enable the Council to deliver its commitment to improve SEN (Special Educational Needs) provision in the borough.
- 3.3 Key objectives are to:
- Provide opportunities for children with Special Educational Needs to have their needs met in mainstream schools wherever possible.
 - Where provision in a special setting is required it should be as local and inclusive as possible.
 - There should be as much choice for parents as possible.
- 3.4 As part of the above commitment the Clarendon School will become an umbrella SEN provider. It is intended that the current site on Hanworth Road will be vacated in September 2018 and extended provision delivered across 3 sites:
- The Gateway Centre adjacent to Twickenham Academy on Percy Road in Twickenham was completed in July 2015 and supports SEN pupils aged 11 – 19 years.
 - The Richmond College Campus will accommodate KS3-4 pupils currently based at the Clarendon School site, from September 2018.
 - Newhouse Centre: LBRuT propose to modify accommodation at this centre to accommodate KS1 and KS2 pupils from September 2017.

- 3.5 This project forms the last part of the strategic plan to increase the capacity of Clarendon School, having already provided upgraded premises at The Gateway and with the development of KS3-4 provision at the Richmond College Campus planned for completion by September 2018.
- 3.6 The Newhouse Centre, which is currently unoccupied, is part of Clarendon School. It was previously used until August 2015 as a specialist KS3-4 provision for 25 pupils with (BESD) needs.

Buckingham Road

- 3.7 Buckingham Road a well-lit, traffic calmed road, local residential road, approximately 7.3 metres in width, with footways on both sides. Most properties have off-street parking, but on-street parking does occur along the north-east side of the road. During the parking survey cars were observed to be parked on both sides of the road near Buckingham Primary School. There are houses on the north-eastern side of the road. Buckingham Primary School is located on the south-western side, just south of the site.

Tangley Park Road

- 3.8 Tangley Park Road is a residential road approximately 5.8 metres in width, with footways on both sides. It connects from Buckingham Road leading to a Sainsbury's Car Park. Behind Sainsbury's store there are residential amenities such as a Community Centre and a Public house. The road is well lit with parking on the eastern side of the road, just south of Buckingham Road. Warner Close connects to the east side approximately 70m from Buckingham Road.

Haslemere Close

- 3.9 Haslemere Close is located north-east of Buckingham Road, just north of the Tangley Park Road junction. It is a residential close with one footway along the west side of the road and a grass verge on the east side. The road is approximately 4.8m wide and most cars park along the western side of the road.

Current Pupil and Staff Postcode Plot

- 3.10 Pupil and staff postcodes have been obtained and plotted on a Google map to show the catchment and distribution of pupils and staff. The location of pupil home postcodes can be seen in **Figure 2** below and staff home postcodes can be seen in **Figure 3**.

Figure 2 – Pupil Postcode Location Plan

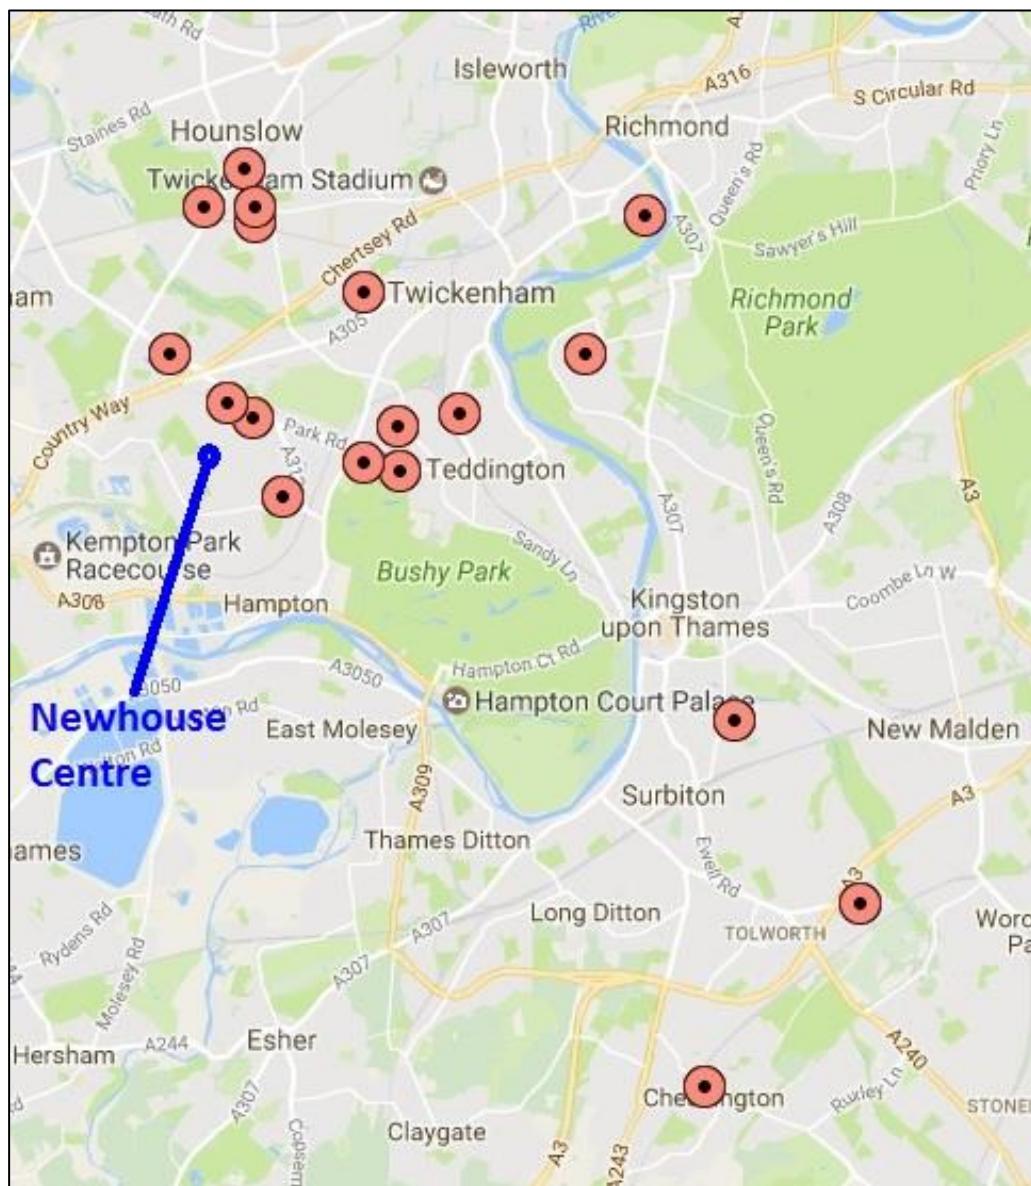

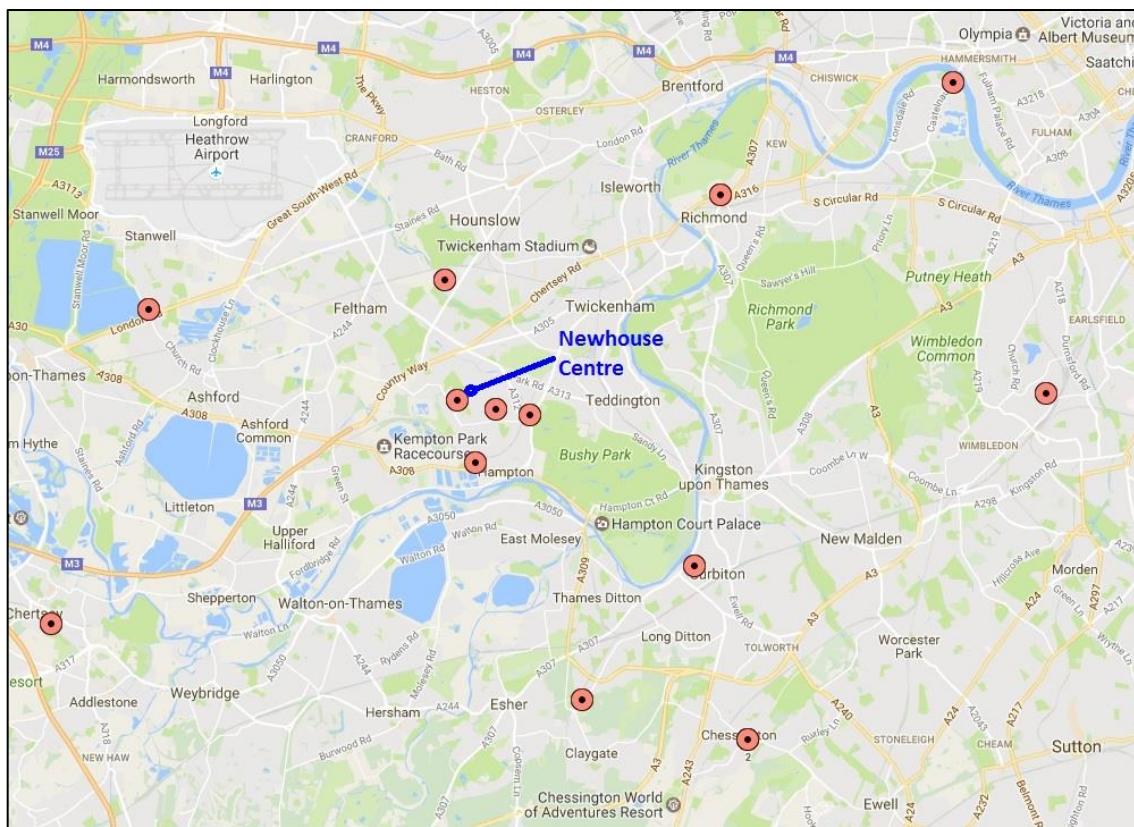

Figure 3 – Staff Postcode Location Plan

- 3.11 It can be seen from **Figure 2**, that the vast majority of pupils live within the Twickenham and Hounslow area. Staff postcodes can be seen in **Figure 3** above.

Personal Injury Accident Data

- 3.12 There have been 2 recorded accidents in the vicinity of the site in the 5 years between 2012 and 2016 and these are recorded as “slight” injury accidents. One accident occurred close to the access to Buckingham Primary School in 2014 and the other occurred in 2015, at the junction of Buckingham Road with Tangley Park Road. This is a low number of accidents for a 5 year period and only resulted in slight injuries, requiring minimal treatment.

4.0 Proposed Development

- 4.1 The proposal is to relocate the Primary aged pupils from Clarendon School on Hanworth Road to the Newhouse Centre site. The proposed school at the Newhouse Centre on Buckingham Road will have a minimum of 22 staff and 50 pupils, 26 of which will be transferred from Clarendon School. It will be a Special Educational Needs (SEN) School. The proposed layout plan can be seen in **Appendix A**.
- 4.2 Currently 26 of the pupils attend the Clarendon School at Hanworth Road. They will attend the Newhouse Centre from September 2017, along with another 24 new pupils, which will be accommodated over a period of 2-3 years.
- 4.3 The existing building will be increased in size from 714sqm to 839sqm in footprint. Just 1 car parking space for the headteacher and 1 disabled parking space will be provided within the curtilage of the site. There will also be a permanent space for one of the School mini-buses. Any parents wishing to drive their children to School or other staff driving to School will have to park on-street. Pedestrian and cyclist access to the site will be from Buckingham Road only, via a separate access to vehicles.
- 4.4 Mini-buses will continue to be used to transport pupils from home to the school making it a sustainable option for the proposal. It is estimated that up to 6 mini-buses will be required at drop off/collection times. Currently 56% of the Primary aged pupils which will transfer to the Newhouse Centre take the School mini-bus to School, but the School would like to increase this to 80-90%.
- 4.5 The vehicle egress onto Buckingham Road will be retained and a new access will be formed along Tangle Park Road, approximately 28m south of its junction with Buckingham Road. The new access will be approximately 4.8m wide and have an automated sliding gate. Suitable restrictions or School Keep Clear markings will be provided across the new access. It is proposed that the existing access along Buckingham Road will be used as an exit from the site, whilst the new access will be used as an entrance into the site, with appropriate signage.
- 4.6 The School gates will need to be closed when all pupils are boarding or alighting the mini-buses. Six vehicles will be able to remain within the site, with the gates closed, at any one time. The first mini-bus to arrive will park in the dedicated mini-bus parking bay. The second will park in front of the disabled and headteachers parking bay. The remaining mini-buses will park to the west of this. A traffic marshall will be required to help organise the mini-buses in the morning and afternoon. A pedestrian only zone will be marked out to the west of the building, where it will be safe for pedestrians to wait before boarding their mini-bus.
- 4.7 Swept paths showing a 6.3m long mini-bus entering the site (from Tangle Park Road), parking in various locations and exiting (onto Buckingham Road) in a forward gear, can be seen in **Appendix B**.

5.0 Parking Survey

- 5.1 Detailed Parking Beat Surveys and on-site observations were undertaken on 14th December 2016 at 08:20am, 08:55am and 09:30am in the morning and 2:30pm, 3:15pm and 4:00pm in the afternoon. The surveys were undertaken along, Buckingham Road, Tangley Park Road, and the adjoining segments of road, Warner Close, Embleton Walk and Haslemere Close. The surveys were undertaken within 100m of the site, which it is reasonable to expect parents to walk with young children from their cars. It also covered the access to Buckingham Primary School.
- 5.2 A study area plan is included within **Appendix C**. The purpose of this survey was to determine the parking capacity on-street and the impact that the existing Buckingham Primary School, adjacent to the Newhouse Centre, could have on parking availability in the surrounding area.

Methodology

- 5.3 In order to quantify the existing situation parking beat surveys were undertaken before, during and after the morning and afternoon peak school parking times. The purpose of this is to establish the car parking available, the number of parkers in spaces and to determine which cars were associated with the school parking.
- 5.4 Following the survey, the data was analysed and detailed parking survey plans recording the actual parking activity on site drawn up. Parked vehicle location plans are located in **Appendix D**. The results have allowed us to identify where there is spare capacity in the surveyed area.
- 5.5 In order to ascertain whether or not there was any spare capacity within the Study Area, we first of all undertook a survey of all roads and recorded existing dropped kerbs and accesses. From these surveys we were then able to identify the areas in which vehicles could safely park. **Table 1** lists the 'No. of safe parking spaces' for each road, based on 5.5m to 6.0m long parallel parking spaces, in locations which still allow for the normal flow of traffic, as well as maintaining access/egress to the residential properties adjacent.

Table 1 – No. Of Safe Spaces in Each Road

Location	Total spaces in *Safe Location
Buckingham Road	38
Tangley Park Road (incl. Warner Close and Embleton Walk)	34
Haslemere Close	12
ALL ROADS	84

Observations

- 5.6 It was noted from the site observations that the traffic builds up on Buckingham Road during the school drop off and pick up times. The results for these areas are included in **Table 2, 3 and 4** below. Parked vehicle location plans can be found in **Appendix D**.

Table 2 – Results of parking survey for designated area for Buckingham Road

Designated Parking Spaces Buckingham Road				
Time	Total Safe Spaces	Cars Parked	Parking Stress (%)	Spare Safe Spaces
08:20am	38	24	63%	14
08:55am	38	29	76%	9
09:30am	38	24	63%	14
02:30pm	38	20	53%	18
03:15pm	38	20	53%	18
04:00pm	38	19	50%	19

Table 3 – Results of parking survey for designated area for Tangley Park Road (incl Warner Cl & Embleton Walk)

Designated Parking Spaces Tangley Park Road				
Time	Total Safe Spaces	Cars Parked	Parking Stress (%)	Spare Safe Spaces
08:20am	34	10	29%	24
08:55am	34	20	53%	14
09:30am	34	10	26%	24
02:30pm	34	13	34%	21
03:15pm	34	28	74%	6
04:00pm	34	12	32%	22

Table 4 – Results of parking survey for designated area for Haslemere Close

Designated Parking Spaces Haslemere Close				
Time	Total Safe Spaces	Cars Parked	Parking Stress (%)	Spare Safe Spaces
08:20am	12	3	25%	9
08:55am	12	5	42%	7
09:30am	12	3	25%	9
02:30pm	12	3	25%	9
03:15pm	12	4	33%	8
04:00pm	12	3	25%	9

- 5.7 In the morning, the first parent cars began arriving at Tangley Park Road at approximately 8:40am. The parents were observed to be parking predominately on Tangley Park Road. The results for just this area are included in **Table 3** above.
- 5.8 For Buckingham Road as shown in **Table 2**, there was an increase of 5 parked cars at 8:55am (school start time). However, no increase in parked cars between 2:30 am to 3:15am, during the afternoon peak period. However, for Tangley Park Road an increase of 15 cars from 2:30pm to 3:15pm was observed and the parking stress went up from 34% to 74%.

Results Summary

- 5.9 The results of the parking survey for all the roads (Buckingham Road, Tangley Park Road and Haslemere Close) are summarised below in **Table 5**.

Table 5 – Results of parking survey for all on-street spaces

Time	Total Parking Spaces			
	Total Safe Spaces	Cars Parked	Parking Stress (%)	Spare Safe Spaces
08:20am	84	37	44%	47
08:55am	84	54	64%	30
09:30am	84	37	44%	47
02:30pm	84	36	43%	48
03:15pm	84	52	62%	32
04:00pm	84	34	40%	50

- 5.10 As can be seen from **Table 5** above, even at peak school times, the roads surrounding the Newhouse Centre in the study area still had capacity for at least 30 additional cars. The parking beat surveys have shown that there were a total of 30 spare spaces out of 84 in the morning “drop off” peak and 32 in the afternoon “pick up” peak out of 84.

6.0 School Travel Survey

- 6.1 A School Travel Survey was undertaken of the existing primary aged pupils at Clarendon SEN School, in December 2016. A questionnaire was given to all pupils / parents and staff. The questionnaire asked questions about existing travel habits and ideal travel arrangements. We received completed questionnaires from 18 pupils (69%), and 18 members of staff (90%) completed the questionnaire. A summary of the results and brief conclusions are described below.
- 6.2 The results of the survey show that 56% (10 of out of 18) of pupils currently take a School bus (mini-bus) to School; this represents the majority of pupils. 22% (4 out of 18) of pupils walk to and from school whilst the remaining pupils/parents (22%, 4 out of 18) take a car to school. No pupil's cycle or scoot, or take any other form of public transport (i.e. Public Bus/ Rail / Tube etc.) except the mini-bus.
- 6.3 The pupils were asked how they would like to travel to School and 11% said they would like to walk, 83% said they would like to come by School bus (mini-bus) and 6% said they would like to come by car.
- 6.4 In the staff questionnaires, 17% of staff walk to and from School, 6% cycle to School, 17% take the public bus and 60% come by car. When asked "What would be your main reason for choosing this mode of transport?", 67% stated convenience, 11% stated that cost was the factor, 17% stated it was the length of their journey and 6% said that security was an issue. Out of those staff members who use a car, 6 stated that a car is essential for the job, whilst 4 said they drove for childcare reasons.
- 6.5 From the travel survey it can be seen that there is some scope to reduce the number of parents and staff driving to School alone. 50% of staff members said they would be interested in car sharing. Pupils indicated a clear willingness to travel by School bus and it is the Schools aim to accommodate as many pupils as possible into the School mini-buses.

7.0 Highway Impact

- 7.1 When undertaking a Transport Statement (TS) for a new site, it is normal practice to consider the likely impact of the proposed development in the peak hours, i.e. when the combination of the existing traffic and the proposed is at its highest. We have assessed the impact that the proposed reinstatement of the School at Newhouse Centre could have on the local residential roads in terms of additional parking requirements and availability on-street, and possible remedial measures to help reduce the impact will be discussed in **Section 8.0**.

Existing Trips

- 7.2 At present there are no trips attracted to the site, because it is unoccupied. However, it does have a current use as a Secondary BESD School, so trips of a similar nature to the proposed would have been attracted to the site in the past.
- 7.3 The parking surveys undertaken on 14th December 2016 and presented in **Section 5.0**, show that at the busiest time (8:55am) 54 cars were parked on-street within 100m of the Newhouse Centre. There are approximately 84 on-street spaces available within this area, which means that at the busiest time, there were 30 spaces available on-street.
- 7.4 The travel survey presented in **Section 6.0**, shows that pupils currently travel by the following modes:

Table 6 – How the children currently travel to School (from 2016 Travel Survey)

Mode of Travel	% travelling by mode
Car	22%
Walk	22%
School mini-bus	56%

- 7.5 The travel survey also showed that staff currently travel by the following modes:

Table 7 – How the staff travel to School (from 2016 Travel Survey)

Mode of Travel	% travelling by mode
Car	60% (11 members of staff)
Walk	17% (3 members of staff)
Public bus	17% (3 members of staff)
Cycle	6% (1 member of staff)

Proposed Trips

- 7.6 As explained previously, 2 off-street parking spaces will be provided on-site, including one disabled bay and one for the headteacher. This means that all other staff will have to park on-street. The travel survey showed that 11 of the 22 members of staff will travel to School by car. However, the School is implementing a Travel Plan and school staff will be encouraged to walk if possible and car share.
- 7.7 In terms of pupil trips, **Table 8** below shows the likely modes of travel based on the Primary aged pupils, which will transfer from Clarendon School. The percentage travelling by each mode has been multiplied by the 50 pupils which will attend the School.

Table 8 – How the children will travel to School (based on 2016 Travel Survey)

Mode of Travel	% travelling by mode
Car	22% (11 pupils)
Walk	22% (11 pupils)
School mini-bus	56% (28 pupils)

- 7.8 As can be seen from **Table 8** above, just 11 pupils will be driven to School. The remaining 39 pupils will travel on foot or by School mini-bus. Up to six School mini-bus will enter the site and will have minimal impact on the on-street parking arrangements. There may be a loss of up to 4 car on-street spaces as a result of the new access. The School has a desire to increase the number of pupils travelling to School by mini-bus to at least 80%, which would equate to approximately 40 pupils. If this is achieved, then just 5 pupils (10%) could be driven to School.
- 7.9 Assuming a worst case scenario and that the travel patterns remain as existing, the surveys show that at most 11 parent cars and 11 staff cars could be attracted to the site. The travel surveys undertaken in December show that there is capacity for approximately 26 additional cars to park on-street (accounting for the approximate 4 lost spaces due to the new access) the busiest time during the morning peak period.
- 7.10 From the above, it can be seen that there is spare capacity for the maximum additional 22 parent and staff cars to park on-street. In reality, far fewer parent cars will be attracted to the school, as the School will be encouraging more use of the School mini-buses and other sustainable forms of transport. Staff will also be encouraged to travel more sustainably, whether that be on foot, public transport or car sharing.

8.0 Sustainable Transport

Pedestrians

- 8.1 Pedestrians will access the site via a gate to the front of the School on Buckingham, as shown in **Appendix A**.
- 8.2 For pedestrians without mobility impairment, the Institution of Highways and Transportation (IHT) in their publication, 'Guidelines for Providing for Journeys on Foot 2000' make a series of suggested acceptable walking distances in relation to some common facilities. **Table 10** below sets out suggested acceptable walking distances in relation to some common facilities.

Table 10 – Suggested Acceptable Walking Distances

	Town Centres, Retail	Employment, School, Tourism	Elsewhere
Desirable	200m	500m	400m
Acceptable	400m	1,000m	800m
Preferred Maximum	800m	2,000m	1,200m

Cyclists

- 8.3 It is widely accepted, as detailed in the recently withdrawn Planning Policy Guidance 13 (PPG13) that for a distance of up to 5,000m 'cycling can reasonably be considered as an alternative to travelling by private car'. On the basis of a relatively slow cycling speed of 15kph, this distance could be achieved in 20 minutes.

On Site Provision

- 8.4 Richmond Borough Council's Parking Standards states that 5 spaces should be provided per classroom, depending on the nature of the School. Staff will be provided with 8 spaces. It will not be suitable for pupils to cycle, due to their SEN status.

Buses

- 8.5 There are currently no buses that stop directly outside the entrance to the proposed school. The IHT document 'Guidelines for Public Transport in Developments' dated March 1999, states that the maximum walking distance to a bus stop should not exceed more than 400m and preferably no further than 300m. Here is a summary of the bus services below. The nearest bus stops are located along Hanworth Road and The Avenue, to the north and east of the site, approximately 350m from the site. Full bus timetables are included within **Appendix E**.

Service 111 – Kingston Station – Heathrow Central Bus Station

- 8.6 The 111 bus runs for 24 hours, between the hours of 05:50am – 19:30pm, it comes every 9 – 10 mins and destinations available using this service include Heathrow, Cranford, Hounslow, Hampton, Hampton Court Green and Kingston. The total bus route journey varies from 1 hour (at midnight) until 1hr 30minutes in the afternoon.

Service 285 – Kingston, Cromwell Road Bus Station to Heathrow Airport Central

- 8.7 The 285 runs for 24 hours, between the hours of 06:10am – 19:20pm, it comes every 10 mins and destinations available using this service include Heathrow, Feltham, Hampton Hill, Teddington, and Kingston. The total bus route journey varies from 45 minutes (at midnight) to 1hr 5 minutes in the evening.

Service R70 – Hampton – Richmond

- 8.8 The R70 runs from approximately 05:40am – 01:35am and destinations available using this service include Hampton, Nurserylands, Hampton Hill, Fulwell, Twickenham and Richmond. The total bus route journey varies from 38 minutes in the morning until 55 minutes in the evening.

PTAL Rating

- 8.9 Public Transport Accessibility Levels (PTALs) are a measure of the accessibility of a given point to the local public transport network, taking into account the walk time and service availability.
- 8.10 The PTAL for the proposed site is 1b. The full results can be found in **Appendix F**.

School Travel Plan

- 8.11 The current School Travel Plan has been updated to support this Application. As part of this process we will be looking at ways of improving school safety, increasing the use of sustainable transport methods for pupil journeys to and from the school.
- 8.12 The final format and content of the School's updated TP will be a matter for further liaison between Clarendon SEN School and the Local Planning & Highways Authority (London Borough of Richmond upon Thames), with the completed plan offered for final approval by the Authority prior to implementation.
- 8.13 The Plan is not intended to be against the use of cars, but will detail the alternative modes of transport available as much as possible. The Plan is designed to encourage pupils, parents and staff to use cars more efficiently where necessary, whilst providing incentives to use alternative modes of transport. It should be noted that the applicant will be contributing towards a number of measures that will encourage pupils and visitors to the site to use alternative modes of transport other than the car.

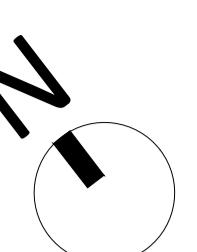

- 8.14 In light of the findings in the previous sections and the impact that expanding the School may have on the surrounding environment, in terms of road safety and increased congestion, it will be necessary to promote alternatives to the car. The School has set out a series of measures in their accompanying Travel Plan, which will encourage pupils and parents to walk and take the School bus. These could include:
- Giving advice on personalised travel planning;
 - Include advice to parents in newsletters about considerate parking and considering walking their children to School;
 - Promoting a Road Safety Week, with the involvement of the parents, at the start of each year and encourage parents to walk with their children to School on that week and beyond;
 - Setting up car share schemes for staff and parents;
- 8.15 None of the pupils will be able to travel independently to School. Many of the pupils have limited or no awareness of the dangers of traffic. The Schools life skills curriculum has 7 travel related expectations. Pupils will be taught travel training skills to promote road safety and awareness of danger. This will include walking safely on the pavement, choosing a safe place to cross and how to use a zebra crossing. Pupils will also be given the opportunity to learn to ride a trike. Those pupils who are able to ride a bike will take part in Bikeability training in year 6.
- 8.16 In addition to the measures that will be promoted to encourage walking to the School, as an alternative to the car, it is recognised that many children and staff do not live close enough to the School to be able to walk or cycle. In order to allow these children to travel by more sustainable modes, the School has also set out a series of measures in the accompanying Travel Plan, which will promote the use of public transport and School mini-bus, if feasible. These could include:
- Erect information on public transport in key locations within the site;
 - Include information on other modes of transport other than the car in welcome packs for visitors and new parents;
 - Include on the Schools web site other modes of transport available;
 - Consider public transport discounts for staff;
 - Set up car share database for staff and consider opt-in database for parents to allow their children to car share.
- 8.17 Many studies have been carried out by the producers of products or schemes, which aim to reduce car usage and increase walking and/or cycling. For example, Surrey County Councils GoldenBoot Challenge has found that an 11% reduction in car use can be achieved (<http://www.saferoutestoschools.com/gbcresults/8/gbcchallengeresults/>). (<http://www.dft.gov.uk/publications/bikeability-training/>).

9.0 Conclusions

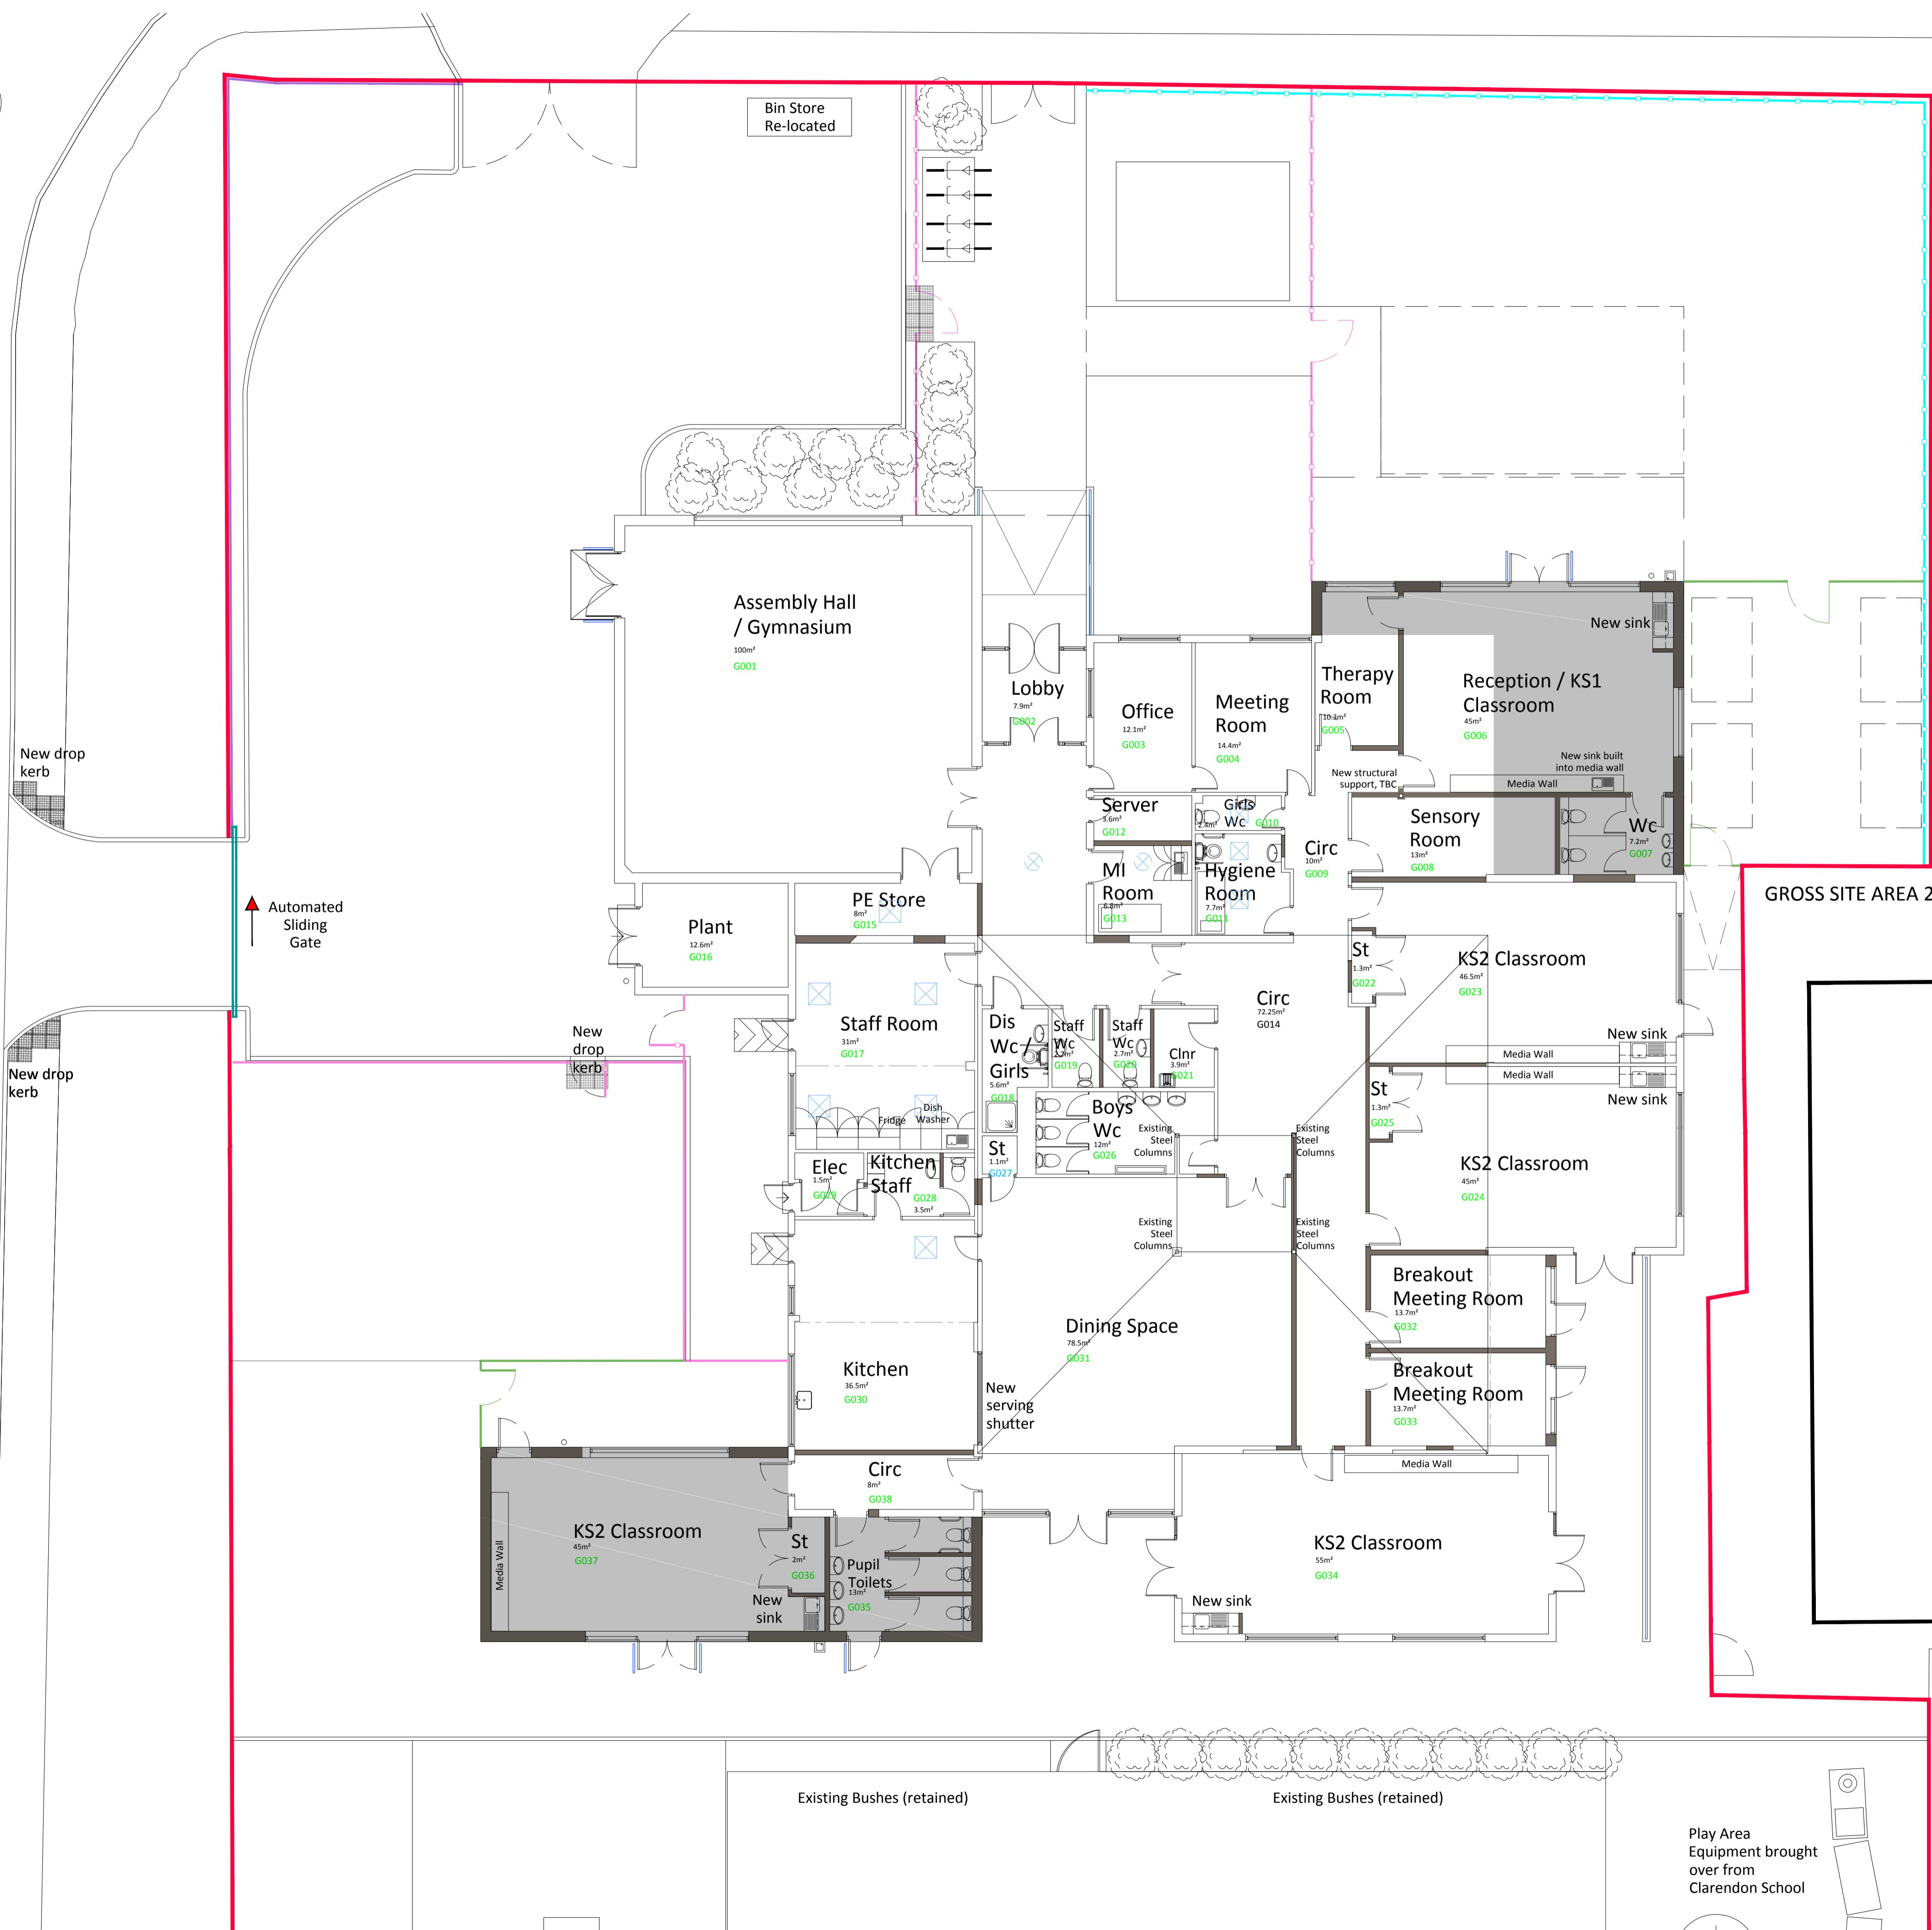

- 9.1 The Stilwell Partnership has been instructed by London Borough of Richmond upon Thames to undertake a Transport Statement, to support a Planning Application for the proposed SEN Primary School at Newhouse Centre, Buckingham Road, TW12 2LT, accommodating 50 pupils and 22 staff, which will include 25 pupils relocating from Clarendon SEN School.
- 9.2 We have shown that the School at Newhouse Centre would have a manageable impact in terms of increasing congestion in the surrounding roads during School pick-up and drop-off times. The majority of pupils will be dropped off by School mini-bus and many will walk to School.
- 9.3 The school will be implementing an updated School Travel Plan, which shows that there are a number of opportunities for promoting sustainable alternatives to the car.
- 9.4 The impact from the proposed Newhouse Centre development will be minimal. The vast majority of pupils will either travel to School on-foot or by School mini-bus. Between 5 and 11 pupils could be driven to School, for which there is capacity on-street. In addition, up to 11 members of staff could drive to School, although measure such as car sharing will be encouraged.
- 9.5 In summary, we conclude that the proposed development can be accommodated without significant detriment to vehicular flows and road safety on the surrounding highway network.

Appendix F

PTAL Rating

PTAL output for Base Year	
I b	
TW12 3LT	
Buckingham Rd, Hampton TW12 3LT, UK	
Easting: 512903, Northing: 171130	
Grid Cell: 36499	
Report generated: 20/01/2017	
Calculation Parameters	
Day of Week	M-F
Time Period	AM Peak
Walk Speed	4.8 kph
Bus Node Max. Walk Access Time (mins)	8
Bus Reliability Factor	2.0
LU Station Max. Walk Access Time (mins)	12
LU Reliability Factor	0.75
National Rail Station Max. Walk Access Time (mins)	12
National Rail Reliability Factor	0.75
