

Note:
 The selected specimens are native trees to provide and break up the fallow area.
 These are combined with swathes of native plants that will provide:
 1. corridors for badgers to move around in
 2. habitats for insects / worms which are main elements of badger diet
 3. shields of cover to maintain privacy for set.
 The proposed planting was prepared with the badger consultant.

PLANTS SCHEDULE

1 Trees				
Code	Species	Height (m)	Plant	Depth (cm)
1	Alder	3-4	1	3
2	Horse Chestnut	3-4	1	3
3	Maple	3-4	1	3
