Yes  No

#### 7. Identification Of Tree(s) And Description Of Works

Please identify the tree(s) and provide a full and clear specification of the works you want to carry out. Continue on a separate sheet if necessary. You might find it useful to contact an arborist (tree surgeon) for help with defining appropriate work. Where trees are protected by a TPO, please number them as shown in the First Schedule to the TPO where this is available. Use the same numbers on your sketch plan (see guidance notes).

Please provide the following information below : tree species (and the number used on the sketch plan) and description of works. Where trees are protected by a TPO you must also provide reasons for the work and, where trees are being felled, please give your proposals for planting replacement trees (including quantity, species, position and size) or reasons for not wanting to replant.

*E.g. Oak (T3) - fell because of excessive shading and low amenity value. Replant with 1 standard ash in the same place.*

T333 Ilex aquifolium - Fell as the tree has died with the exception of a secondary stem which is also to be felled due to its poor value and leaning. The living secondary stem appears to originate from unmanaged basal growth.

#### 8. Trees - Additional Information

A sketch plan clearly showing the position of trees listed in Question 7 must be provided when applying for works to trees covered by a TPO. A sketch plan is also advised when notifying the LPA of works to trees in a conservation area (see guidance notes).
