Type of comment: Object to the proposal

Comment: We live Barnes and are writing to ask that the council refuse this planning application.

In recent years, much new accommodation has been built in Mortlake and Barnes – the traffic congestion has steadily become worse. While the building may have been piecemeal, the impact on traffic has been cumulative. There has been little planning to accommodate this increase.

Similarly, with this development, there is no strategic approach to resolving traffic congestion – it needs to be a combined effort with TFL and the Council. The size of this development will exacerbate a worsening situation with harmful impacts affecting all road “users” including bus passengers, pedestrians and of course people living by them. An estimate additional 500 car journeys are estimated to arise from this new development.

The specific concerns are:

- There are too many parking spaces planned. In total 703 parking spaces have been allocated for

residents and visitors.

- 1,200 pupil school will generate a significant increase in traffic and movements at morning peak hours, particularly by public transport and bicycle. The traffic assessment has not adequately assessed this impact, particularly regarding pedestrians
- The Chalker's Corner changes will not resolve the issue of increased traffic. The developer's plans include major road works at Chalker's Corner, aimed they claim, at improving traffic movements at peak hours. This is far from conclusive and may indeed simply attract further through traffic.

The planning application needs to promote a smaller increase in car usage along with improved public transportation.
