Comment: First I need to say that this proposal to turn this already busy junction into an even larger traffic jam is very saddening and worrying.

Saddening because of the impending loss of such beautiful and needed trees with grass walking area (They soak up pollution).

The walking area is used by so many people and gives a healthy soft view to this busy traffic area that is already too near the homes of the area.

Worrying because I can not see how anybody could see this idea as a solution to the traffic problems? This would increase the problem by making a 2 lane traffic bottleneck into a 3 lane bottleneck.

The traffic would still not have anywhere to disperse into?

It would increase the speed of cars coming around the corner off the 316 which is already to fast, except that is when there is gridlock stand still of cars.

It is already very hard getting out of Chertsey Court, you have to fight and push your way out through the traffic, and that is only 2 lanes of problem, it would be 3!

So proposal: make a 3 lane traffic jam instead of the 2 lane traffic jam, killing and taking away the much loved and needed well established trees in the progress.

This proposal will turn the area into an extension of the 316 making the area into a HELLHOLE of extra noise, pollution, frustration and anger (which is high in the traffic jams) and danger.

Why make things far worse???

PLEASE leave the road width, Trees, Grass walkway alone?

Please don't kill the nature of this corner and us with it.

I already have enough breathing and stress problems which gets worse year by year.
