

6. Site Investigations

This section consists of information on site investigation reports that have been collated by the Contaminated Land Team.

6.1 GIS Attribute Data for Site Investigations

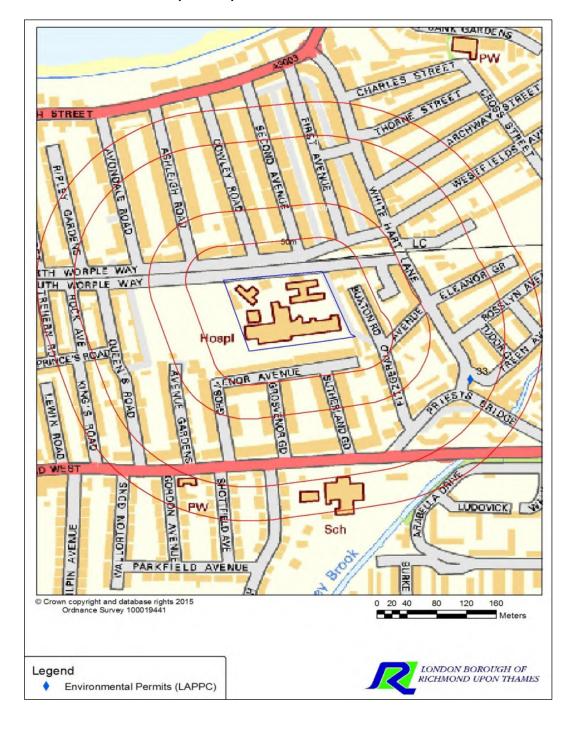

Selection Summary for layer 0 feature(s) identified on site.

1 feature(s) identified off site within 50 metres

ID	Name	Address	Туре	Approx. distance (m)	Approx. Area (m2)	Grid Ref.
On Site						
None						
Identified Off-site	e - Within 50m					
B/M/S/4/1	37 Grosvenor Avenue	Mortlake & Barnes Common	Planning/Redevelopment	49.60	1198	521093, 175601

7. Environmental Permits (LAPPC)

7.1 GIS Attribute Data for Environmental Permits (LAPPC)

Selection Summary for layer

- 0 feature(s) identified on site.
- 0 feature(s) identified off site within 50 metres
- 0 feature(s) identified off site within 50 100 metres
- 1 feature(s) identified off site within 100 200 metres
- 0 feature(s) identified off site within 200 250 metres

ld	Address	Issue_Date	Process	Approx. distance (m)	Grid Ref.

investigations					
identify contan					
potential recep					
potential migra					
pathways?					
Phase II S	Strategy				Comments
Has an outline		N	No outline Cor	nceptu	al Model or preliminary risk assessment
Model been un	dertaken?	•	undertaken.		The state of the s

Has a written sampling strategy been provided?	N		
Has a suitable borehole plan been provided?	Y	See Plans A & B.No north arrow.	
Is the sampling frequency and pattern suitable?	N		
Is the proposed groundwater/gas sampling strategy suitable?	N	None proposed.	
Were sample locations and sampling undertaken as specified on the site plan and sample plan?	Υ		
Will the proposed sampling provide a reliable data set?	N	No of samples provided for analysis not known.	
Site Investigation		Comments	
How many and what type of boreholes were undertaken at the site:		Four trial pits (unspecified depth).	
Are the type and frequency of monitoring installation adequate?	N	None installed.	
Have appropriate logs been presented to BS5930 standard?	N	Basic geotechnical logs.	
Was any visual/olfactory evidence of contamination encountered during the investigation?		Unknown	
Have any photographs been taken?	N		
Field Tests		Comments	
Were any field tests were carried out?	N		
Have any field test results been adequately reported?			
Has reinstatement been carried out avoid creation of new pollutant pathways?		Unknown.	

Was adequate gas and groundwater monitoring undertaken?	N	None undertaken.
---	---	------------------

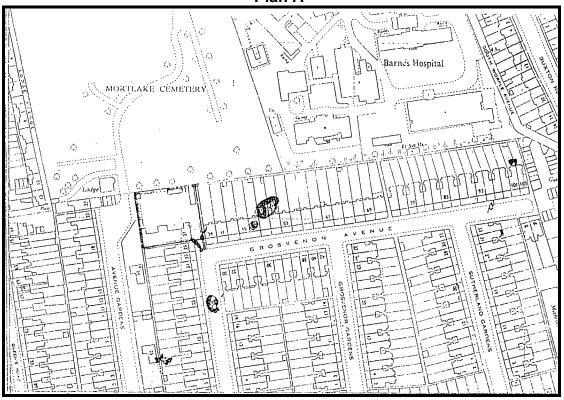

Laboratory Analysis		Comments
Has an analytical strategy been included?	N	
Has a justification for selection of determinands been provided?	N	
Which contaminants have exceeded guideline values?		With exception pf sulphates, no contamination testing undertaken.
Are there any contaminants of concern where guideline values are not appropriate?		N/a
Is sampling suite suitable for site contaminants identified in conceptual model?		N/a
Were any problems encountered during sample collection, transport and storage?		N/a
Was an accredited laboratory used e.g. MCERTS, UKAS?		N/a
Were any problems encountered during laboratory analysis?		N/a

Results		Comments
Have variations in chemical values across the site and at depth been described?	N	
Have any descriptive statistics or plots been applied to the chemical results?	Z	
Groundwater chemical results been described?	N	
Have suitable Annexes been compiled?	N	

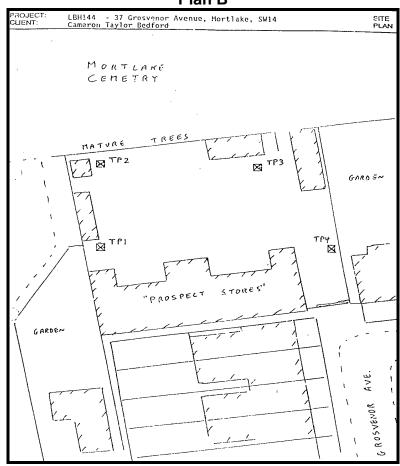

Conceptual Model and Risk Assessment		Comments
Has an adequate revised Conceptual Model been carried out and justified by the laboratory results.	N	No Conceptual Model undertaken.
Which guideline values have laboratory results been compared with?		N/a
Have input parameters been provided?		N/a
What contaminants were Risk Assessed?		None.
Have all pollutant linkage scenarios been discussed?	N	
Has a Site Specific Risk Assessment been carried out? If not, does one need to be carried out?	N	
Are conclusions justified by data presented?	N	
Have any uncertainties or limitations been highlighted?	N	
Have appropriate recommendations been provided?	N	
Were any QA procedures undertaken and what results were presented?	N	

Audit Appraisal	
	Inadequate information provided.
Poor	Report includes no analysis of threat posed by potential contaminated land including Conceptual Model, contaminant analysis or Risk Assessment.
