Subject: Comment on The Stag Brewery planning applications

I object to the applications in connection with this Development on the grounds that all of them will generate a new and large volume of local traffic, thereby adding to the existing problem of traffic build-up at the level crossing by Mortlake Station.

This will create more air pollution, affecting particularly children and the elderly, and without doubt noise and disturbance for the entire neighbourhood. As it is vehicles do not as a rule pay heed to notices requesting them to switch off motors while waiting for the barriers to be raised.

An already bad situation will likely be made intolerable if any of these applications are permitted to proceed.

Julian Heddy, 1 Bexhill Road, East Sheen, SW14 7NF
