Subject: Mortlake / Stag Brewery proposed redevelopment - OBJECTION

I would like to add my voice to the strong objections noted about redevelopment of this site. We have lived in the Kew area for 35 years and travelling is noticeably worse (usually by bus) over the last 5 years. The area is currently choked with traffic - it currently is taking c 30 minutes to travel on the bus from Barnes Bridge to Chalkers Corner. However, I agree redevelopment of the difficult traffic light system at Chalkers Corner needs review - likewise the dangerous and nearby Manor Circus roundabout.

My objection rests on detrimental development in an already busy area, taking away the small amount of green space.

With train barriers at Manor Road and Mortlake, the roads are already totally clogged up - with the ensuing air pollution / traffic issues.

Very few local people can afford what the developers propose - this results in a loss of community spirit and bland areas of overpriced flats.

Maybe open up the old Brewery site as a total community site for workshops, places for the community to gather, additional green spaces, sites for small local businesses to get a foothold in the community.

Thank you.
