Subject: Stag Brewery Site Comments

Dear Sir / Madam,

I am a local resident living near to Mortlake station on the East Sheen side of the tracks.

I write in reference to the below planning permission documents:

- Ref 18/0547/FUL for the development to the East of Ship Lane
- Ref 18/0548/FUL for the development to the West of Ship Lane which includes the School and Playing Fields
- Ref 18/0549/FUL for the alterations to Chalker's Corner and the removal of an area which currently forms part of Chertsey Court.

I would like to express my concerns as follows:

- The cumulative density of the site is overwhelming
- The local infrastructure cannot accommodate the increase in traffic
- There is no strategy for improving the public transportation to help alleviate the situation and importantly, no plan to address the issues of the level-crossing
- Inadequate re-provision of the protected land – the playing fields and the Chertsey Court land.

The density of the site, number of residents and visitors will have a significant impact on traffic.

Impact on Traffic

In my opinion there is no strategic approach to resolving traffic congestion – it needs to be a combined effort with TFL and the Council. The size of this development will exacerbate a worsening situation with harmful impacts affecting all road “users” including bus passengers, pedestrians and of course people living by them. An estimate additional 500 car journeys are estimated to arise from this new development.

The specific concerns are:

- There are too many parking spaces planned. In total 703 parking spaces have been allocated for residents and visitors.
- 1,200 pupil school will generate a significant increase in traffic and movements at morning peak hours, particularly by public transport and bicycle. The traffic assessment has not adequately assessed this impact, particularly regarding pedestrians
- The Chalker's Corner changes will not resolve the issue of increased traffic. The developer's plans include major road works at Chalker's Corner, aimed they claim, at improving traffic movements at peak hours. This is far from conclusive and may indeed simply attract further through traffic.

The planning application needs to promote a smaller increase in car usage along with improved public transportation.

Public Transport and the Level Crossing

Stated in the 2011 planning brief: "The Council must be assured that transportation and highways issues can be satisfactorily addressed through the proposals. The consultation process identified a number of transport issues in the area which included concerns about impacts on road congestion, existing bus routes...". This planning application has not addressed these issues satisfactorily.

- The proposals do not include a strategy for public transport. Public transport in this area is extremely weak compared with surrounding parts of London. There is no prospect of more trains ever stopping at Mortlake and now, even the 209 Route is under threat of a reduced service under the proposals to extend the 485 bus service. Little mention is made of the 190 bus service from Richmond over Chiswick Bridge to Hammersmith and the opportunity of increasing its frequency. This needs to be re-examined.
- There is no plan to address the pedestrian and vehicular risks at the Sheen Lane level crossing. Network Rail's own risk assessment of this crossing scores it highly on both individual and collective risk and gives it the highest risk category: it is the 4th riskiest CCTV crossing on the Wessex Route. It identifies vehicle-pedestrian as the main risk. The development at the Stag Brewery will increase use (vehicles and pedestrians) of this crossing at peak periods. Increased traffic will lead to further delays, greater frustration and an increased likelihood of accident. The planning application needs to address this in conjunction with the Borough and Network Rail.

Protection of Green Space

Mortlake has a small amount of open green space of which the brewery's playing fields represent 53% by area. The playing fields have protection under the classification of 'Other Open Land of Townscape Importance' (OOLTI), while protection is not absolute, it is not clear from the Plans how the developer will meet the criteria which allows development to occur, which are based around the 'quantum, quality and openness' of the land being removed which having to be re-provided on the site. The same issue of re-provision applies to the OOLTI land lost at Chertsey Court.

The loss of the two grass playing fields which the Council previously indicated it would require to be retained will prejudice users (one pitch instead of two), neighbours (through floodlighting and traffic), and our ecosystems and may negatively impact flood water protection. It also fails to respect the natural beauty of Mortlake, and the introduction of fences and barriers will impair the current open aspect of the site.

Thank you for reading these views which I know are shared by many others.

Yours faithfully
Lizzie Winn
