Ref 18/0549/FUL - Chalker's Corner widening and green space

I oppose the widening of Chalker's Corner and removal of existing grass verges and trees.

The proposed plan will add to the amount of traffic sitting in an already polluted junction, the borough should be working to reducing this rather than increasing it. It seems the only reason to do this is to make the over dense proposed development viable, but is the scheme works to mitigate traffic its viability is only on one level; it stands to make the quality of the lives of existing locals more miserable only to please the profit of the developers.

The traffic is in part too much due to the downtime of the level crossing in Sheen Lane which cannot be changed without a substantial re-designing of the road or sinking of the railway line. Widening Chalker's Corner will not solve this issue whatsoever.

It is an absolutely outrage that the suggestion of removing a grass verge and mature trees will benefit anyone. The residents of Chertsey Court should not have their barrier between them and the road removed. The noise and pollution will increase and make their quality of life worse. This should be protected at all costs.
