Comments

Type of comment: Object to the proposal

Comment: I object to the above proposals and now more so with the GLA revisions to the proposals, particularly the increase in no of units. My concern is on the impact on the already stretched amenities of the local area and increase in pollution.

The proposed changes to Chalkers Corner will not address the issue of a significant increase in traffic. All the proposal does is creates an additional "holding" capacity of traffic At Chalkers Corner. The multiple lanes all bottleneck into single lanes toward the development site. This "holding" area will result in a significant increase in air and noise pollution for residents in the immediate area (my property is 129 LRR). Furthermore the current landscaping will be devastated as trees are removed and roads widened significantly impacting the local area.

I don't believe that the main planning application 18/0547/FUL can be decided without an effective solution to the increase in traffic.

Regards
Nick Rogers
