Re; Planning application 20/1496/FUL

I wish to object to this application on several grounds as stated in my objection attached to the case details on your website, but one point needs clarification.

Could the Committee please enquire into the fact that a 20 metre separation for a 7 metre high building from a block of council flats was considered inadequate, whilst now an 8 metre separation for an 11 high building is considered to be adequate.

Could it be made clear if there has been a change in standards since this rejection in 2013 or if there are different rules applying to private houses rather than Council properties.

If not, the application must fail in order to maintain consistent standards.

Yours sincerely

Clive Waterman BDS, MSc.
