

Heritage statement

Many of the properties on our road are considered to be of Townscape Merit. It is with this in mind that our proposal aims to enhance the aesthetic appearance of our front garden. At present two standard bins, a garden waste wheelie bin and two recycling bins and a food waste caddie are kept in the front garden. Whilst every endeavour is made to keep them tidy this proposal for a bin store would ensure a more aesthetically sympathetic solution to improve the landscape setting in keeping with the period property. Constructing the bin store from timber will also be in keeping with the natural look and feel of the garden which is surrounded by low level and mid level hedges and a central Acer tree. Our aim is to keep the bins tidy and less visible for both us, our neighbours and passers by through having a discrete timber bin store.
