

09.6 LANDSCAPE DESIGN - HARD PALETTE

The hard landscape materials palette has been informed by the existing materials on site and within the local area. The materials chosen complement those within the architectural proposals.

The materials have been selected to support the various uses across the masterplan and be in line with the proposed spatial character.

Note that any resurfacing or proposed pathways within root protection areas is to be of a no dig construction.

Rubber crumb play surface

Rubber play surface (existing)

Rubber play trail surface

High quality concrete block paving (two tones)

Resin bound gravel
