Comments

Type of comment: Object to the proposal

Comment: We strongly object to the proposal on the basis of the unsuitable infrastructure of the surrounding roads for the increase in traffic (including construction traffic during the development phase) that such a development will inevitably result in.

The White Hart Lane and South Worple Way junction is already precarious being both narrow and right next to the railway crossing, which causes a lot of problems (and queues) with traffic trying to turn right into South Worple Way from White Hart Lane resulting in cars getting stuck on the level crossing. The road junction is not big enough, resulting in larger vehicles having to mount the pavement which is dangerous for the many pedestrians (including young families with buggies, children on bikes/scooters etc) living in the area.

South Worple Way is already treated as a rat run and this development will only increase the traffic along there and leading into the Royals which is a quiet residential area with effectively single lane roads due to the cars parked on both sides of the road.
