

# FIRE SAFETY STATEMENT

---

**Project:** Richmond Park Wall backing Roehampton Vale  
**Client:** The Royal Parks  
**Title:** Fire Safety Strategy  
**Date:** December 2021

---

**Ref/File No:** 3.1

## **FIRE SAFETY STATEMENT:**

The proposed works are for repairs of a section of the section of Richmond Park boundary wall (Listed Grade II) on the southeast side of the Park backing Roehampton Vale and therefore will not change or increase the risk of fire to the surroundings.

The brick plinth of the Wall is collapsed and parting from the main structure due to a combination of plant colonisation and mortar failure. The collapsed section extends for approximately 30 metres. Further sections of 20-30 metres are partly collapsed or have failings at the top of the plinth. The wall needs to be urgently rebuilt/refaced to reinstate the historic Park Boundary and maintain the structural integrity of the wall and mitigate further deterioration. Repairs do not involve any methods of construction likely to increase any fire risk.
