Watering	✓	✓	✓	✓	✓
Gen. Maintenance	✓	✓	✓		
Stake removal			✓		
Formative prune				✓	

Watering

50 litres of clean water every two weeks between May and September

Gen. Maintenance

During the period of establishment it will be necessary to check that the natural growth of the tree is not constricted by the ties. Replace ties as necessary.

Formative prune

Pruning to produce a young tree which in maturity will be free from any major physical weaknesses. Removal of any deadwood, crossing branches and competing leading stems.
