Type of comment: Object to the proposal

Comment: While I agree to the proposed development of a brown field site, I think this proposal has always been one of greed by placing far too many residential units that the local infrastructure just cannot cope with. i.e Train commute and the LBRUT and TFL road systems, especially with Hammersmith bridge being closed for a very many years / decades while finance for the replacement is argued over. In the early proposals the Chalkers Corner junction HAD to be redesigned according to the developers to allow sufficient traffic flow in rush hour. What has changed apart from more traffic queues due to increased car use?
