Type of comment: Object to the proposal

Comment: This development would be detrimental to an area that is already struggling with transport and traffic issues. The closure of Sheen Gate and Hammersmith Bridge creates constant heavy traffic. The infrastructure is not in place to cope with the increased demand on services this development would create. The design in terms of size and density is also totally out of keeping with the area. I am objecting in terms of the size and density, the increase in traffic and therefore the increase in pollution in an area where air pollution already exceeds three WHO limits.
