Dear Sirs,

REF: 22/0900/OUT and 22/0902/FUL

This development certainly shouldn't take place before Hammersmith Bridge is opened, the traffic is already horrendous and causing a lot of pollution.

The amount of trucks and workers coming in to tear down existing premises and dispose of, and even more trucks coming in with equipment and new materials will cause untold problems within the area and the noise and disturbance exasperated by the lack of Hammersmith Bridge. Even with the bridge opened to traffic will cause lots of pollution and health problems in the area. I object more to the problems caused by the tearing down and rebuilding than anything else. How long will this take - so many trucks will cause more problems with the Sheen Lane railway crossing. I don't understand how this can even be thought about without the access being addressed, maybe only by boat.

There are a lot of problems that can be foreseen with the application, the end result is one thing but the beforehand problems actually achieving this will be unbelievable.

Yours faithfully

Lynne Cox
