Dear Sirs

With regards to the above proposed plans they are still going to produce far too much traffic for the area and the area surrounding. Whereas before you just had the one business you are still proposing things that will effect the quality of life that has been built up over years and not forgetting the recent and on going crisis that are still with us. Life health and welfare will be severely affected. I don't want covid going up, I don't want more fatal road accidents I don't want even worse traffic delays, short cuts being taken if the bridge is ever repaired and the bridge that takes us to Hammersmith will be put under unbearable strain. As I've said previously we were only ever built alongside Barnes as small little villages (that's mortlake) the roads and the actual area are not built for so many people or so much traffic.

Regards

Resident 50+ years
