Comments

Type of comment: Object to the proposal

Comment: Due to the expectation that there is likely to be shortage this winter in the capacity of the power grid in the designated area to carry the existing demand for electricity, (already noted as resulting in brief outages), the extra power demand generated by this proposed development will inevitably create considerable consternation about this development.

Furthermore, will there being a ban on any further developments of flats/houses in the West London boroughs of Hillingdon, Hounslow and Ealing due to the loss of spare capacity in the grid having a huge negative impact on the ability to supply sustainable power to developments in around these aforementioned outer London boroughs - <https://www.ft.com/content/3f3535b8-02ed-4789-86dd-68283bfe2901> - including LBRUT?

The local MP should be made aware of this grotesque, out of all proportion, development, and give support in objecting to this planning application which will have a very negative impact on this part of the borough. It cannot afford to have overloaded planning applications.
