Notes

The survey has been oriented to Ordnance Survey (OS) National Grid (OSGB36) using Industry Standard Network RTK GPS equipment utilising the OS Active Network (OS Net).
A true OSGB36 coordinate has been established on site using the OSTN15 (transformation) & OSGB15 (geoid) models.
The survey detail has been correlated to this point and a further one (or more) OSGB36 points established to produce a true OS bearing for angle orientation.
Scale factor 1.0 has been applied therefore the survey coordinates are shown on a pseudo OS grid.
All levels are in metres unless otherwise specified
All heights are in millimetres unless otherwise specified
