

NOTE:
10m bespoke lighting column, to include AV Projector for the Maltings building facade. To be developed in coordination with client and Gillespies.

NOTE:
Lighting integrated within water feature. To be developed in coordination with Water Feature Specialist, client and Gillespies.

Note:
Michael Grubb Studio have positioned column mounted, bollard, and upright luminaires to avoid tree root balls and canopies. Where unable to avoid roots balls, the use of shallow mounting equipment for column, bollard and upright fittings is proposed. Where tree canopies are unavoidable, Michael Grubb Studio propose maintenance strategies based on the tree species requirements. Final details to be confirmed at stage 4 in coordination with relevant consultants and client.

Information Only

- Drawing Information:
1. Do not scale from this drawing.
 2. This drawing should be read in conjunction with the current set of luminaire specification sheets.
 3. Exact luminaire locations will be confirmed prior to the commencement of works on site.
 4. The number located within each reference represents the correct level only. This may not be the same as the actual wiring circuit.
 5. If in doubt, AS2.
