

Comment on a planning application

Application Details

Application: 22/0900/OUT

Address: The Stag Brewery Lower Richmond Road Mortlake London SW14 7ET

Proposal: Hybrid application to include: 1. Demolition of existing buildings (except the Maltings and the façade of the Bottling Plant and former Hotel), walls, associated structures, site clearance and groundworks, to allow for the comprehensive phased redevelopment of the site: 2. Detailed application for the works to the east side of Ship Lane which comprise: a. Alterations and extensions to existing buildings and erection of buildings varying in height from 3 to 9 storeys plus a basement of one to two storeys below ground to allow for residential apartments; flexible use floorspace for retail, financial and professional services, café/restaurant and drinking establishment uses, offices, non-residential institutions and community use and boathouse; Hotel / public house with accommodation; Cinema and Offices. b. New pedestrian, vehicle and cycle accesses and internal routes, and associated highway works. c. Provision of on-site cycle, vehicle and servicing parking at surface and basement level. d. Provision of public open space, amenity and play space and landscaping. e. Flood defence and towpath works. f. Installation of plant and energy equipment 3. Outline application, with all matters reserved for works to the west of Ship Lane which comprise: a. The erection of a single storey basement and buildings varying in height from 3 to 8 storeys. b. Residential development. c. Provision of on-site cycle, vehicle and servicing parking. d. Provision of public open space, amenity and play space and landscaping. e. New pedestrian, vehicle and cycle accesses and internal routes, and associated highways works.

Comments

Type of comment: Object to the proposal

Comment: The latest set of design changes appear to be offered merely to comply with the latest building regulations without addressing any of the significant failings raised about earlier applications, e.g. the internal layouts of the buildings submitted in detail on the east of the site.. These failings include: -

Applications A & B

Density, Building Height & Scale of Development

- The scheme now proposes 1071 residential units, remaining far too dense given the scale and density of the existing community, the sensitive riverside location, heritage context, and the severe and unique access constraints of this site.
- The Council's own Design Review Panel (DRP letter 28.02.22.) - "felt the scheme is too dense for this area - and resonates more with Central London where higher density is expected."
- Many of the residential blocks still exceed 7 floors in height and overwhelm the character of the Thames bankside setting and still dominate the locally protected Maltings building and adjacent heritage assets. The buildings with heights above 7 floors contravene the original Planning Brief, the Local Plan and the Pre-Publication Local Plan.
- A rural character prevails along the Thames from Putney/Hammersmith to Kew creating a green corridor known as the Wooded Towpath. The proposed densely packed blocks combined with their height and scale will destroy this unique stretch of the River Thames.

Affordable Housing

- Despite the increase in residential units to 1071 from 813 in the earlier 2020 planning applications the affordable percentage remains unacceptably low at around 19% - (39 Intermediate units and 165 Social Rent).
- The Financial Viability Assessment makes no definitive proposal in terms of the final percentage (either unit numbers or

habitable rooms), and states that this is still subject to further negotiation with Richmond. The current proposals represent a 32% increase in unit numbers from the 2020 scheme and yet little or no increase in the offer of affordable units. The scheme thus contravenes both London Plan and Local Plan Policy at a time of greatest need for affordable homes.

- Infrastructure, Highways & Access

- Traffic generation and congestion remain as major concerns and objections to these proposals. There is just one means of access/egress to the site which is already gridlocked and not just at peak times. The supporting reports and data do not reflect the actual conditions of severe congestion and poor air quality.
- Local residents are experiencing huge delays in travelling out of the area by car due to already increased congestion throughout the day, and equivalent delays on returning into Mortlake. Development of the Homebase site, the Barnes Hospital site, and future redevelopment of the Kew Retail Park will make local conditions unsustainable.
- Hammersmith Bridge remains closed to traffic with no prospect of it being fully re-opened for vehicular traffic and bus services for many years.
- Local bus and train services have also been reduced and although 106 Agreement funds are allocated for improved local bus services, TfL have confirmed there are no definitive plans.
- How does Stantec justify their proposed upgrading of the PTAL accessibility of the site? (See Technical Note - Bespoke PTAL Calculation Summary - 01.07.22).
- The proposed location of the bus stops and pedestrian crossings on the Lower Richmond Road and Mortlake High St, together with the Mortlake Station level crossing, will create unbearable constraints to traffic movement especially at am-peak times with the concentrated arrival of 1250 school pupils/staff and other site generated traffic/deliveries.
- The scheme will increase the current local population significantly - by c. 2500 residents -and yet there is scant provision for increased Community, Health and Cultural Facilities. The employment uses and student population of 1250 will add to these local infrastructure pressures.
