Subject: Barnes Hospital, South Worple Way

I am confused.

I have received 2 notifications for applications for planning permissions, apparently for the same site, Barnes Hospital

No **22/3758/FUL** dated 10 February (comments to be made within 21 days by 3 March 2023).

No **21/3107/FUL** dated 20 February 2023 (comments to be made within 14 days by 6 March 2023).

No 22/3758/FUL seems a reasonable solution.

No 21/3107/FUL is not reasonable. Cramming over 100 homes on to a relatively small site with no nearby public transport, and a road approach so narrow that there is room for one car only at a time.

Objections to this second proposal have been well aired and I am somewhat concerned to see a similar proposal yet again. The proposed buildings are particularly unattractive, especially as they are to be plonked alongside and behind long established residential houses only 2 floors high. Does the second application replace the first? If so why was this not made clear? There are only a few days between each application.

I am strongly against 21/3107/FUL.

Yours faithfully
