Our Ref: 201345/ml/KL/02

19 April 2023

Dear Tom

KINGSTON BRIDGE HOUSE

Further to your recent email we have reviewed the comments from LLFA and their reasons for objecting. Firstly, the storage volumes to achieve greenfield rates has been provided in the SuDS proforma a copy of which is enclosed. The storage requirements for a 1 in 1 year event is 24 cubic meters, for the 1 in 30 year event 52 cubic meters and the 1 in 100 year event requires 68 cubic meters. I trust the storage requirements are now clear.

The LLFA are correct in the depth of storage on the roofs has been reduced from 200mm to 150mm the modelling clearly demonstrated that the depth of rainfall over the roofs was only 66mm deep for a 1 in 100 year +40%, so the opportunity to reduce the building height was taken and the available storage depth was reduced to 150mm which still allows a 100mm freeboard over the model flood depth.

The drainage calculations do not need to be rerun as they depth of available storage has no impact on the actual depth of rainfall over the roof as it is greater then the rain fall the SuDS proforma has been updated to reflect the reduction in storage from 200 to 150mm and a copy is enclosed.

The site comprises of roofs permeable paving and soft landscaping, the roof and paving areas are all pick up in the SuDS proforma, there is no section for landscaping areas to be included. As the LLFA insist the entire area of the site needs to be considered we have included the soft landscaped areas under bioretention in the proforma.

With regards to the last part of the objection Westcombe Management will be responsible for the maintenance of the drainage and SuDS features.

I trust the above is sufficient for the LLFA to review the strategy and remove their objection, however if you require further information please let me know.

Yours sincerely

Kevin Lang

	Project / Site Name (including sub- catchment / stage / phase where appropriate)	Kingston Bridge House	
etails	Address & post code	at Kingston Bridge house, Church Road, Hampton Wick, KT1 4AG
