The garage is free standing and located to the rear of the property and accessed by a driveway that runs adjacent to the house. It has a pitched roof and short eaves. The replacement garage roof is a visual match for the existing roof. There are no proposed changes to the size or dimensions to the roof and to match the existing roof.

Conclusion from the Pre-Application Advice received

"Conclusion

The proposed development represents a proposal that is likely to be supported by Council. As this development is occurring in a Conservation Area, it will require a development application to be submitted and permission gained from the Council prior to commencement of construction. The site is designated as a Building of Townscape Merit and is noted to have several architectural features of importance to the area's character. The garage subject to this development appears to be a more modern addition to the site. The proposal to replace the roof with a similar style roof of the same dimensions and similar material finish is considered to likely result in a neutral impact upon the overall architectural merit of the site and its relationship to the surrounding area. No negative impact to neighbour amenity is anticipated. Removal of asbestos from the building in a safe manner is supported by Council."

It is an important principle of decision-making that the process is open and transparent.

For the purposes of this question, "related to" means related, by birth or otherwise, closely enough that a fair-minded and informed observer, having considered the facts, would conclude that there was bias on the part of the decision-maker in the Local Planning Authority.
