Type of comment: Object to the proposal

Comment: I have strong reservations with regard to the proposed redevelopment as it currently stands under revised application number 22/2204/FUL. It still falls short of what is required for a policy compliant redevelopment scheme. As a local resident to the site of the proposed redevelopment I am deeply concerned that NHG have STILL ignored the local community's concerns regarding the sheer density and height of the planned redevelopment and believe strongly these points are in direct conflict of Richmond Upon Thames current local planning policies.

LP1: The current application STILL takes no regard of the local village character of Hampton Hill comprising a predominance of

2-2½ storey Victorian and Edwardian cottages with narrow streets. This character is confirmed in The Design and Access Statement, the Hampton Hill Village Planning Guidance, and the Hampton Hill Conservation Area Appraisal and Management Plan consultation document. In addition, Hampton Hill has village status in the Local Plan. The proposal CONTINUES to place a 5 storey block of flats right in the heart of this area with no reference to the context outlined above. Developing 5 storeys will lead to an overbearing impact and loss of privacy. This effect is exacerbated STILL by the number of balconies at high level. This redevelopment should not be allowed to have its own identity but should be sympathetic to the surrounding Hampton Hill Village character.

LP2: Taller buildings are defined as "those being significantly taller than the neighbouring buildings but less than 18 metres in height". The proposed scheme height is over double the height of neighbouring buildings. Policy LP2 states that the centres of Richmond and Twickenham are areas where taller buildings may be appropriate. Therefore, the taller buildings within this proposed redevelopment are in direct contradiction of LP2 and LP39 due to loss of privacy to existing homes and fails criterion 10 due to its unacceptable visual impact resulting from its height, mass and scale. Hampton Hill is a village and not a town centre.

On a separate note, the rear of Holly Road houses from numbers 24 onwards to the end of the road (bridge end), will all now be overlooked with 20+ windows, where at present there are NO windows overlooking these properties.

I sincerely hope this revised planning application will be suitably scrutinised by the Councillors on the above points (LP1, LP2 and

LP39) and the local plan will be robustly considered. The Planning Office must be challenged.

Due to my points above, I strongly object to this current proposal.
