Subject: Mortlake Stag brewery plans 22/0900/OUT 22/0902/FUL

Hello

I would like reiterate my concerns re the above applications to which I object.

The revised plans still do not address the traffic and environmental problems associated with such a large development in such a small, inaccessible, already over congested space. It is too big and too high and too high density. The low level of affordable housing is absolutely unacceptable.

Carol and William Benham
