

New tree to compensate for the loss of T1. Species and size to be confirmed by the local authority. I would suggest a Silver Birch 12cm - 14cm diameter to offer seasonal amenity and species diversity.

T1 removed to accommodate new wall formation. This will provide more space for the canopy of T2 to develop, and will not impact on wider public amenity.

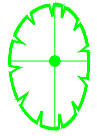

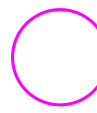

Work for the wall realignment will take place from the pavement side so that no access in the RPA is required.

STRICTLY NO ACCESS BEYOND THE PROTECTIVE FENCE LINE FOR CONSTRUCTION ACTIVITIES.

ANY LANDSCAPING WORKS WILL USE HAND TOOLS AND HAVE ARBORICULTURAL SUPERVISION PRESENT

New planting as part of the scheme can add to the amenity and ecological benefit of the site.

KEY

-  Tree Position with Canopy Spread plus BS5837 Category A1, A2 or A3
-  Tree Position with Canopy Spread plus BS5837 Category B1, B2 or B3
-  Tree Position with Canopy Spread plus BS5837 Category C1, C2 or C3
-  Tree Position with Canopy Spread plus BS5837 Category U
-  Root Protection Area (RPA) - Based on Simple Radius from Tree
-  - First significant Branch direction (FSB)
-  - Protective Fence Line
