Comment: Our main objections would be:

1. Destroying of a natural habitat. We have seen the fox faces peering out at us when we walk by and we enjoy it. The natural flora would be better to look at than a construction site or another building. Those chestnut trees are huge and their roots will surely be affected by construction which could lead them to die. Animals that may use the adjacent trees (like bats/birds) will be negatively affected by the noise of construction
2. The added danger to people, especially children during the construction phase. The roads and pavements are used extensively by residents on foot, scooters, bicycles and cars. With heavy machinery and construction vehicles around there is unnecessary added risk.
3. The dust and noise during work hours (people work at home) and holidays will spoil the tranquil neighbourhood.
- 4.The Privacy of the nearest units may be in jeopardy considering the proposed designs.

General: If something HAD to be done with the property, it should be turned back into usable open space for families to enjoy.

We object,
