

**Former Stag Brewery,
Mortlake
Health Impact Assessment
Addendum, October 2023**

Health Impact Assessment Addendum

Introduction

This Addendum has been prepared by Margaret Collins (Director) and Zoe Crampton (Associate Director) of ekosgen, formerly of Hatch.

Following the submission of the two planning applications in March 2022 (refs: 22/0900/OUT (Application A) and 22/0902/FUL (Application B)) in respect of the Former Stag Brewery, Lower Richmond Road, Mortlake, London ('the Site'), three ES Statement of Conformities/Addendums were submitted to address design changes in August and September 2022 and in May 2023. The LBRuT's Planning Committee resolved to approve both applications in July 2023 and section 106 discussions (planning obligations) between LBRuT and the Applicant are ongoing.

On 24 July 2023 the Secretary of State made a statement confirming the Government's intention to mandate second staircases in new residential buildings above 18 metres. This followed consultation on this matter where expert bodies advocated support for this threshold.

The proposed amendments to the Development have resulted in the following changes to Application A:

- Building 1 (Cinema): Three levels of office changed to residential use (creating 17 new residential units) and decrease in building height by 2.6m. The cinema floor plans remain relatively similar with changes made to accommodate the residential core, refuse and cycle stores, risers and extending the cinema café. The third floor has changed from glazed to bronze cladding to suit the change of use, a cycle store has been added to ground floor and recessed balconies added to accommodate the introduced residential use in this building;
- Building 2: Internal layout changes only (including removal of top floor of duplex) – increase in 1 residential unit;
- Building 4 (The Maltings): Removal of residential floorspace on floor levels 6 and 7 and internal re-configuration to include only one core with two stairs and two lifts – overall decrease in 1 residential unit. Minor elevation changes to the Maltings to re-position the double height windows and change in the layout of the ground floor flexible use areas;
- Building 7: Internal layout changes only (including removal of top floor of duplex) – no change in residential unit numbers;
- Building 8: Re-arrangement of internal layout to accommodate core changes (no change in residential unit mix). Mansard roof stepped out around the southern staircase to accommodate dual staircases to the 8th floor;
- Building 10: Floor to ceiling heights changed very slightly to bring building under 18m;
- Building 11: Internal layout changes only (third lift and second stair added affecting number of habitable rooms) – no change in residential unit numbers;
- Building 12: Internal layout changes only (third lift and second stair added affecting number of habitable rooms) – no change in residential unit numbers;
- Buildings 15 and 17: These buildings are in Development Area 2 and are only in outline. Changes will be internal only;
- Overall increase in residential floorspace by +1,722 sqm GIA and increase in 7 private residential units (increase in 17 residential units in Development Area 1 and decrease in 10 residential units in Development Area 2). No change in affordable residential unit numbers;

- Decrease in office floorspace by -2,571 sqm GIA, increase in cinema floorspace (+149 sqm GIA), and increase in flexible use (+125 sqm GIA);
- Internal re-configuration of the basements to accommodate second stairwells, changes to waste stores, partitions and enlarged sprinkler tanks to satisfy updated electric vehicle fire regulations resulting in a reduction of 15 car parking spaces across the Development;
- Fire strategy amended, resulting in two stairs to all residential buildings over 18m in height and re-introducing connections to the basement car park for the two stair buildings. The basement car park fire strategy has also been updated to provide fire safety enhancements to account for the introduction of EV charging in the basement car park;
- Waste strategy amended, to return the refuse and recycling stores for Buildings 2, 7, 8, 11 and 12 to the basement level. For these buildings, holding stores at ground level have been provided in Buildings 3, 8 and 12 to support the collection process. Buildings 1, 3, 4, 5, 6, 9, 10 and all buildings in Development Area 2 maintain refuse and recycling stores at ground level; and
- Landscaping updates associated with changes to ground floor entrances for Blocks 8, 11 and 12, with amendments to the length of private gardens, additional planting and steps moved.

For the avoidance of doubt, no changes are proposed to Application B (ref: 22/0902/FUL).

For the purpose of this Addendum, it is assumed the local policy background and local baseline position remains as stated in the submitted HIA. An assessment of the impact of the revised Development on human health has been undertaken and any resulting changes to the conclusions of the Assessment have been identified. All methodologies remain as stated in the submitted HIA.

When compared with the submitted Application, the above changes result in the following:

- A decrease in the overall population yield from 2,472 to 2,303 (-169) compared to the submitted HIA (March 2022), and a small immaterial increase from 2,280 to 2,303 (+23 persons) when compared to the April 2023 amendments. Compared to the submitted HIA (March 2022), there is subsequently a reduction in demand for social and community infrastructure, including demand on early years, primary and secondary education, GP services, community facilities, children's play space and open space. Therefore, the impact assessment presented in the submitted HIA (March 2022) is a robust worst-case for the Proposed Development.
- There have been no further changes to the affordable housing provision since the April 2023 amendments, but there has been a small increase (+7 units) in the provision of private housing and in particular, two and three bed-room family units. These changes do not result in any material changes to the assessment of impact on health presented in the submitted HIA, dated March 2022.
- The decrease in office floorspace, and slight increase in flexible floorspace will result in an overall decrease in FTE jobs supported by the proposed Development from 365 gross direct FTE jobs to 291 (-74 FTEs). This does not result in any material changes to the assessment of impact on health presented in the submitted HIA (March 2022).

ekosgen have reviewed the impact of the proposed changes. In summary, the amendments do not result in any material changes of relevance to the HIA and the assessment of impact and the conclusions and recommendations presented in the submitted HIA (March 2022) therefore remain valid.
