Comments

Type of comment: Object to the proposal

Comment: The proposals amount to a significant over-development on this seriously access-constrained site and the proposed transport-related capacity and safety mitigations are completely inadequate. The developer's forecasts for the low use of private transport in an area with very weak public transport are unachievable. This consultation, as requested to be focused on the latest modifications being made for fire safety requirements, should still enable my wider objection to the scheme to be given serious attention.
