Type of comment: Object to the proposal

Comment: I object to the requirement in the letter sent to me dated 20 November 2023 that only amendments to the original applications will be taken into account. This is not a reasonable restriction at this time. By the time the planning applications are reconsidered by the Planning Committee it will be six months since the last permissions were granted. It is over three years (31 July 2020) since the documents supporting the Council's position were posted on their website. The situation must inevitably have changed in that time. The Planning Committee should give full consideration to the situation at the time of the further hearing of the applications.

This site needs to be developed at the earliest opportunity but that cannot mean that decisions are taken to the substantial detriment of the local area. I do not know why the Council believes it is appropriate to ignore the Local Plan in relation to height and density of the residential blocks and to ignore the loss of open space and to ignore the lack of affordable housing and on the basis of the most recent plans even permit its reduction.

I do not know why the Council refuses to reconsider whether the provision of a secondary school is justified by the numbers currently coming through local primary schools. I do not know, but have reason to doubt, whether the numbers were accurate as originally calculated in order to persuade the Department for Education to fund an academy on the site. But that funding is clearly a significant reason for the Council refusing to reconsider the matter.

To the extent that pupils might attend from outside the local area, I do not know whether they would do so, whether staff would be willing to travel to such an inaccessible destination and what the implications would be for an additional 1200 pupils plus staff coming and going to that area in the rush hours. One of the few things that the Council has made clear in public meetings is that it is not willing to consider these issues before the grant of planning permissions. That is unreasonable.

Finally and most importantly, the traffic situation in Sheen and Mortlake is by common consent absolutely dire at present. There is gridlock during many hours on Sheen Lane, Mortlake High Street, Lower Richmond Road, Upper Richmond

Road, Clifford Avenue.....the redevelopment proposals and inevitable additional traffic will make this dire situation catastrophic, and unbearable for local residents and anyone else who is travelling in the area. Time for a rethink to respect local democracy, resolve this critical traffic issue and not to exacerbate it!
