Dear Ms. Thatcher,

Please find enclosed a further 13 letters of support for the planning applications to regenerate the Stag Brewery, Lower Richmond (ref: 22/0900/OUT and 22/0902/FUL).

Nine of the letters are from individuals within the community of Mortlake and wider Richmond Council boundaries, and four are from individuals from nearby areas such as Hammersmith and Fulham who use the same road network and can benefit from the commercial amenities like the cinema.

All representations were collected via the Stag Brewery website <https://stag-brewery.co.uk/>. They have given their consent for their representations to be sent to Richmond Council and uploaded on Richmond Council's website.

These supporters have agreed to the contents of this letter which are submitted on their behalf, urging you to grant consent for the proposals to transform a brownfield site into a state-of-the-art multi-use hub. They recognise the many benefits the development will bring to the area. For ease when logging support these reasons include:

Over 1,000 new homes will be built to help young people onto the housing ladder.

A new school will be provided on site, promoting better quality education and opportunities for children in Mortlake and the surrounding area.

Over 500 new jobs will be available to the local community.

Improved public safety for the community through the provision of new towpaths along the River Thames.

Over £45m will be contributed towards local infrastructure improvements.

The proposals are Air Quality Positive certified.

Kind regards,

XXX

Dear Sir/Madam

Re: The Stag Brewery, Lower Richmond (ref: 22/0900/OUT and 22/0902/FUL)

I am writing in support of the two planning applications for the regeneration of the Stag Brewery.

I welcome these proposals which will transform this underutilised brownfield site into a vibrant state-of-the-art multi-use hub which will provide what Mortlake needs: over 1,000 new homes for young people to get on the housing ladder, more jobs, improved public safety, and most importantly better-quality education and extracurricular opportunities for our children.

I also welcome the scheme's sustainability ambition to be Air Quality Positive with no burning of fossil fuels in the production of heat and hot water across the whole 22 acre site.

Overall, this will create over 500 local jobs, contribute over £45m to improve our local infrastructure, and provide new facilities that can be used not just by the school but by the wider community. As such, I support the application for the regeneration of the Stag Brewery and urge you to grant consent.

Yours Truly,

Raphael Anderson
