

Existing raised bed around T3 will be retained and protected from construction activities with a low fence.

New surfacing within the RPA of T3 will require no excavation below existing soil to minimize root damage.

Plywood boxing will protect street tree from construction activity.

Small bench will be installed within raised bed. Excavation will take place under arboricultural supervision to minimize root damage.

Incursion into the RPA of T4 is not considered significant and no special engineering methodology is recommended.

New hard landscape within the RPA of T8, T9 and T10 is minimal and no special engineering methodology is recommended.

- Tree or Group Reference Number
- Tree Stem Position A Category Tree
- Tree Stem Position B Category Tree
