COST ADVANTAGE

Cost Comparison: DIY Ground Screws Vs. Alternative Foundation Methods

Base Size

Professional Ground Screw Installation

Self-Install Ground Screw Installation

Concrete Base

3m x 3m	▶	£1125	▶	£323	▶	£1575
4m x 4m	▶	£2000	▶	£523	▶	£2800
5m x 5m	▶	£3125	▶	£779	▶	£4375
6m x 6m	▶	£4500	▶	£1093	▶	£6300

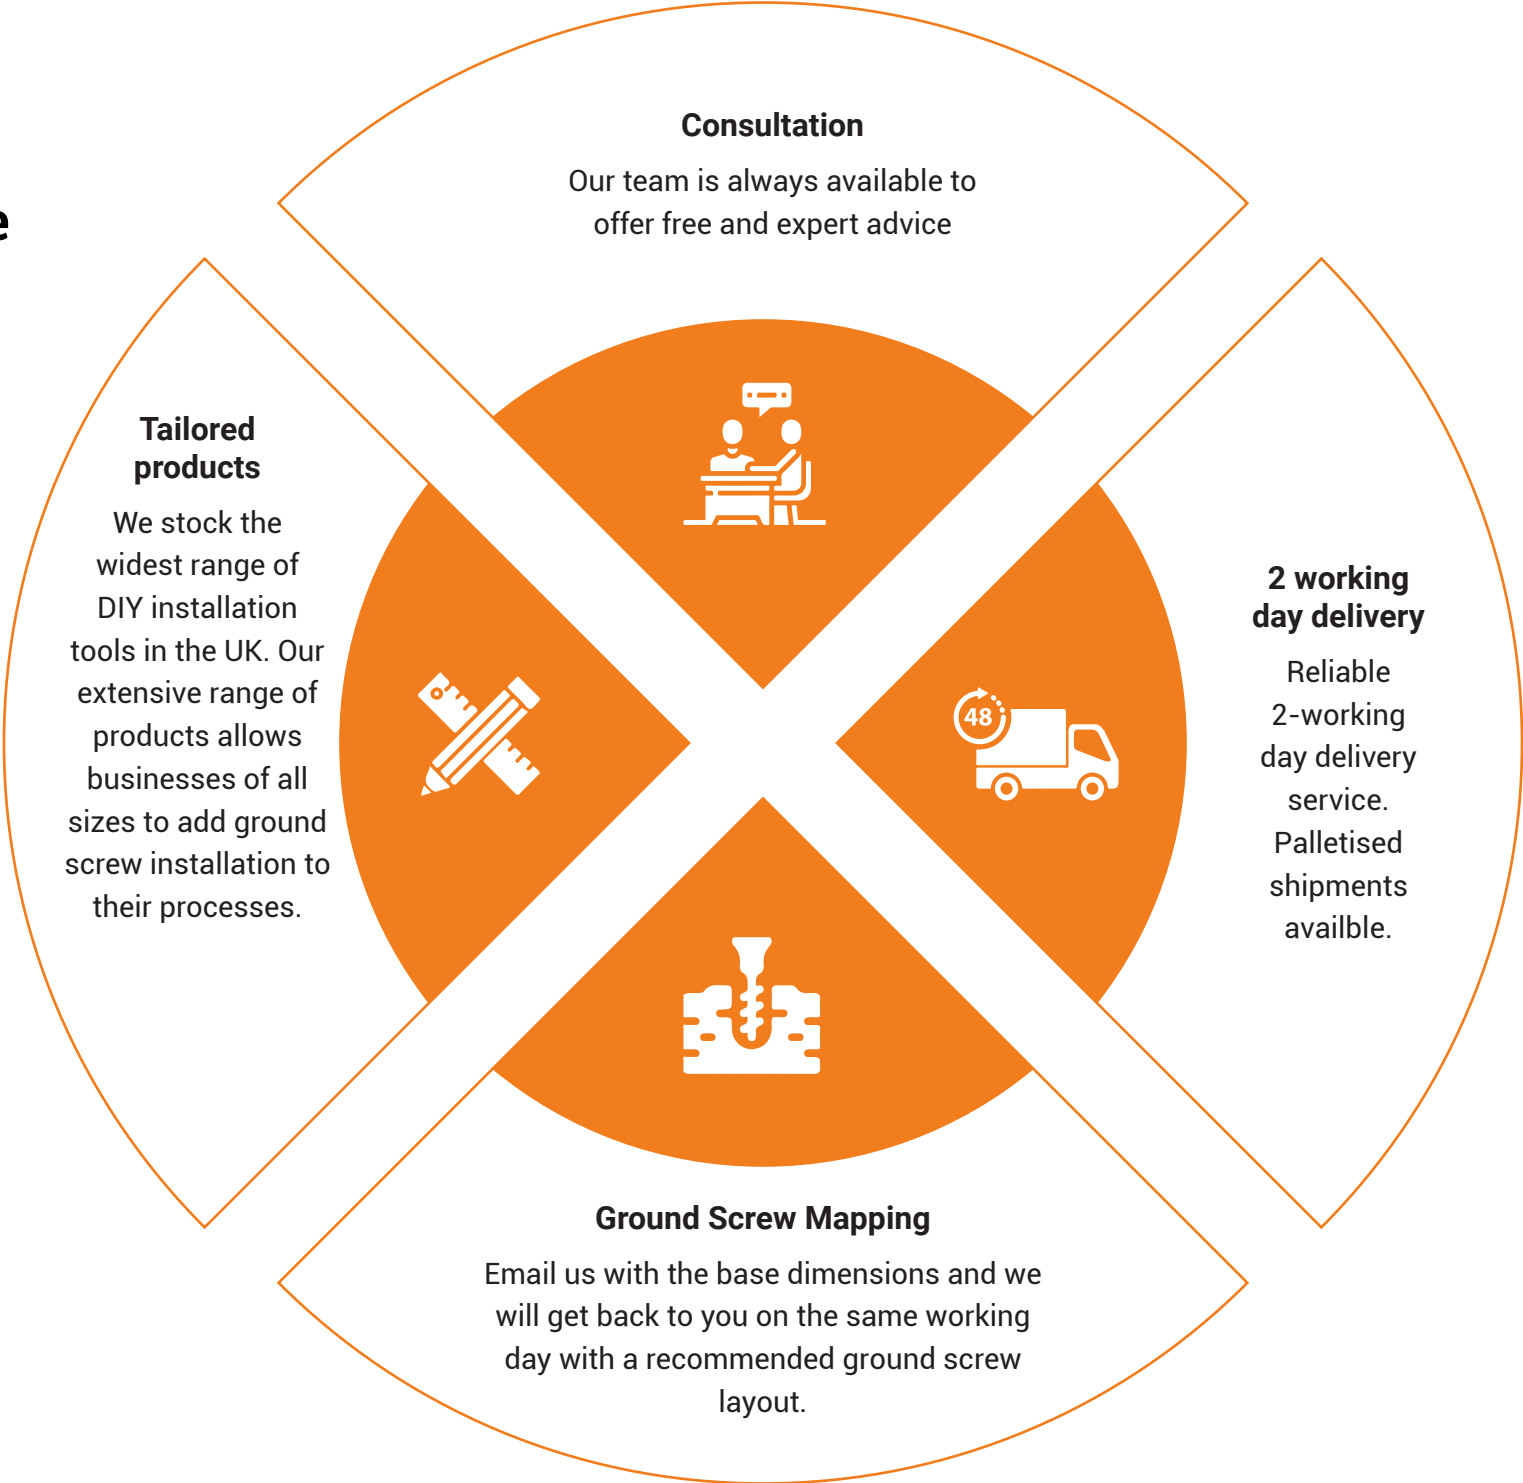

Analysis

The data illustrates a significant cost advantage of self-installation ground screws for building garden room foundations compared to alternative methods such as concrete bases or professional installation services.

Data Source

- Self-install ground screw installation costs include ground screws, joist bracket systems, a standard installation tool and delivery. Prices are based on SIPs Ground Screws products with a 15% trade discount.
- Professional installation is priced at £125 per ground screw installed as per checkatrade.com average price list (Dec 2023).
- Concrete bases are priced at £175 per m2 as per checkatrade.com average price list (Dec 2023).

Our Service

About Our Company

Environmental Commitment

The production of our galvanised steel ground screws emits 60%-71% less co2 than the production of cement for traditional concrete base foundations. Our ground screws do not disturb the surrounding environment they are installed in and can be easily reused and recycled.

Trusted Supplier

We have a track record of delivering high-performance products and committed customer service to businesses across the UK, ensuring reliability and excellence in our foundation solutions.

Vision And Mission

Our Vision

A construction industry with accessible and sustainable foundation solutions. Internalising the foundation process gives businesses increased control and flexibility over their project timeline. We embrace innovation and consistently raise the standards of our DIY foundation system, empowering trade professionals with top-tier products and services.

Our mission

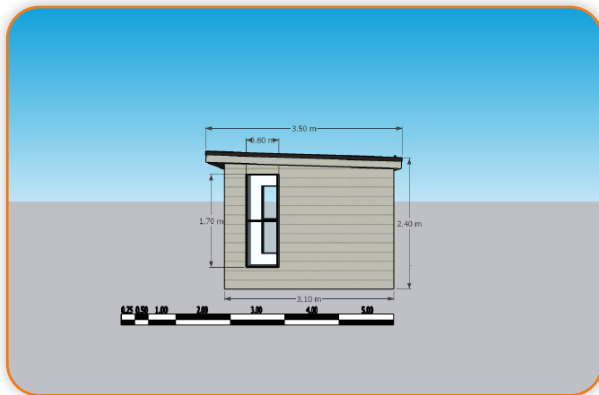

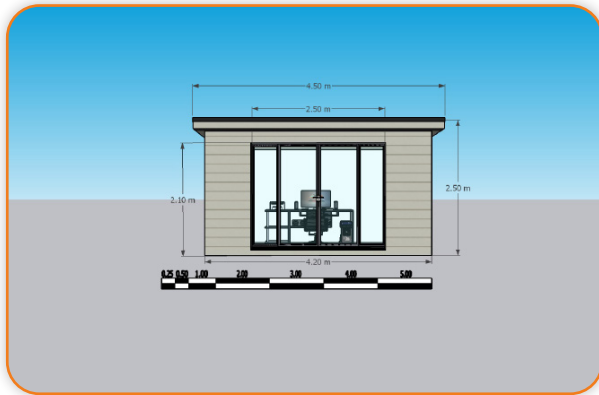

To be the trusted partner for builders, providing time-efficient, cost-effective foundations that lower the environmental impact of construction projects and inspire widespread adoption of the DIY ground screw system in the UK.

Free Designs

As part of our service we offer free bespoke design work in SketchUp as well as full computer-generated designs of your bespoke garden rooms, rendered in Keyshot or Lumion.
