Proposed Rear Elevation - Wisteria Sketch
NTS

The images on the left show that Wisteria previously reached from the garden level to the upper ground floor balcony.

Part of the proposal is to train wisteria to grow up the new extension and along the proposed railings at lower ground floor as well as up to the upper ground floor balcony.

The pod extension and the sides of the garden level extension are proposed to be finished in mirrored cladding panels. This will reflect the landscaping and minimise the impact of the additions.
