Type of comment: Object to the proposal

Comment: In general terms I support the application but I have concerns about the height and massing of the proposed extension at the boundary of my property.

The drawings show the wall height to be over 2.5 metres high.

My understanding is that that the height should be no higher than 2.2 meters tall at the boundary when measured from my side.

I would also appreciate further detail about how the rainwater goods would be managed at the junction of the propose new wall and new roof at the boundary. This is to avoid any potential gutters overhanging.
