Eligibility

Permitted development rights are subject to conditions set by legislation to ensure that only appropriate proposals are eligible.

The need to apply to the Local Planning Authority to see if prior approval is required is one such condition.

The questions below will help determine if the proposals are eligible for this permitted development right

Would the proposed change of use result in the building containing more than two flats?

- ☐ Yes
☒ No

Would a part of the building continue to be:

- In a commercial/business/service use; and/or
- Used as a betting office and/or a pay day loan shop

- ☒ Yes
☐ No

Would the proposed flat(s) only be situated on floor(s) above a floor where at least some of the other proposed mixed uses are to be provided?

- ☒ Yes
☐ No

If the building has a ground floor display window, would any of that ground floor be used as a flat?

- ☐ Yes
☒ No / The building does not have a ground floor display window

Will all the proposed flats have gross internal floor areas of at least 37 square metres, and comply with the [nationally described space standard?](#)

- ☒ Yes
☐ No

Following the change of use, will each flat only be used as a dwelling:

- By a single person or by people living together as a family; or
- By not more than 6 residents living together as a single household (including a household where care is provided for residents)

- ☒ Yes
☐ No

Description of Proposed Works, Impacts and Risks

Proposed works

Please describe the proposed development including details of the flat(s) and other works proposed

Change of use from Class E commercial business and service use to mixed use consisting of Class E commercial business and service use and Class C3 residential (2 flats)

Please provide details on the provision of adequate natural light in all habitable rooms of the dwellinghouses

The proposed floor plans include internal dimensions for each of the habitable rooms and the proposed elevations include dimensions of all windows to provide the necessary information to enable the LPA to assess the matter as required by the legislation. The property has large areas of glazing particularly to the front (High Street) elevation. These are large windows ranging between 1650mm and 1725mm high which provide good natural light to each habitable room. The floor plans show the living/kitchen/dining areas at the front of the building benefitting from these large windows and bedrooms to the rear so that all rooms will benefit from natural light from the full glazed windows. On this basis all habitable rooms will receive adequate natural light commensurate to the use of each of the rooms.

What will be the net increase in dwellinghouses?

2

This figure should be the number of dwellinghouses proposed by the development that is additional to the number of dwellinghouses in the existing building prior to the development.

Please provide details of any arrangements required for the storage and management of domestic waste

The proposed ground floor plan shows a bin storage area of a suitable capacity to provide both waste and recycling bins for the 2 flats (2 x 240L bins per flat) provided within the yard to the rear of the building near to the accesses to the flats. Bin collection will be from Britannia Lane to the rear which already has domestic bins relating to other neighbouring dwellings which are collected by the Council.

Impacts and risks

Please provide details of any contamination risks and how these will be mitigated

Paragraph W 10(c)(i) of the GPDO requires the LPA to determine whether, as a result of the proposed change of use, taking into account any proposed mitigation, the site will be contaminated land as described in Part 2A of the Environmental Protection Act 1990 having regard to the Contaminated Land Statutory Guidance issued by the Secretary of State in April 2012. Part 2A of the Environmental Protection Act 1990 Section 78A(2) defines contaminated land as land in such a condition that (a) significant harm is being caused or there is a significant possibility of such harm being caused, or (b) significant pollution of control waters is being, or is likely to be, caused.

The landowner is unaware of any contamination issues on the site. It is not considered that as a result of the proposed change of use the site will be contaminated land as defined by Part 2A of the 1990 Act.

The application for prior approval relates to change of use of the first and floors only and does not include any external works. Consequently, as the application site comprises a building and hardstanding only and no ground works or excavation is proposed there are no receptors that could result in risk of contamination to future occupiers.

Please provide details of any flooding risks and how these will be mitigated.

2.8 Paragraph W(6) of the GPDO requires the LPA to consult the Environment Agency where the development is –

- (a) in an area within Flood Zone 2 or Flood Zone 3; or
- (b) in an area within Flood Zone 1 which has critical drainage problems and which has been notified to the LPA by the Environment Agency for the purposes of paragraph (zc)(ii) in the Table in Schedule 5 to the Town & Country Planning (Development Management Procedure) (England) Order 2015.

The EA Flood Map shows the site lies within Flood Zone 1 (low risk). The site is at 'very low' risk (the lowest category) of risk from surface water flooding according to the EA Flood Map. We understand the site does not lie within a critical drainage area identified by the EA. The site does not lie within an area liable to flood as identified in the LB Richmond Strategic Flood Risk Assessment.

A flood risk assessment should accompany the application where the site:

- is in Flood Zones 2 or 3; or
- is in an area with critical drainage problems (such areas will have been notified to the Local Planning Authority by the Environment Agency).

[Check if your site location is in Flood Zone 2 or 3 online](#)

Check with your Local Planning Authority to see if your site is in an area with critical drainage problems.

Please provide details of the impacts of noise from any commercial premises on the intended occupiers of the new dwellinghouses and how these will be mitigated

It is not considered there would be unacceptable impacts of noise from commercial premises on the intended occupiers of the development. The GPDO defines "commercial premises" for the purposes of this part of the Order as "normally used for a commercial or industrial undertaking which existed on the date of the application including licensed premises".

There are no surrounding commercial uses or activities which are considered likely to cause a significant noise impact on the proposed residential use. The surrounding uses are mainly retail shops, some with residential uses on upper floors. The premises are of solid masonry brick construction with sash windows and will provide suitable sound insulation for residential purposes from any potential noise from neighbouring commercial premises.

Site information
