Description of Proposed Works

Please describe the proposed works

Project Overview

The proposed shed aims to securely store bicycles and bins, enhancing both the functionality and appearance of my property while respecting the character of the neighbourhood.

Precedent in the Street

It is common practice on our street for properties to have similar front garden sheds. The design I propose replicates an existing structure at a neighbouring property on our street, as shown in the attached photograph. This precedent demonstrates that the shed will be in keeping with the existing streetscape and local aesthetic.

Shed Specifications

- Dimensions:
- Length: 313 cm
- Width: 110 cm
- Height: Slanting roof starting at 120 cm at the front and descending to 110 cm at the back.
- Materials:
- Structure: Brickwork matching the existing front wall of the property, ensuring consistency with the current architectural style.
- Doors and Roof: Slatted wood, providing a natural and visually appealing finish.

Placement and Access

• Front Clearance: A 35 cm gap will be maintained between the front boundary wall and the shed. This space is designated for planting a hedge, which will enhance the greenery and visual appeal of the property frontage.

• Rear Clearance: A 45 cm gap will exist between the shed and the front of the house, ensuring unobstructed access to the drainage systems located at the corner of the garden.

Design Considerations

• Integration with Streetscape: The shed's design mirrors existing structures on the street, contributing to a cohesive neighbourhood appearance.

• Low Visual Impact: The shed's modest height and sloping roof minimise its visual presence, reducing any potential impact on neighbouring properties.

• Material Harmony: Using matching brickwork and natural wood aligns the shed aesthetically with both my property and the surrounding area.

• Environmental Enhancement: The inclusion of a hedge in front of the shed adds to the local greenery, supporting biodiversity and improving the street's visual appeal.

Usage

- The shed will be used solely for the storage of personal bicycles and bins.
- No commercial activities will be conducted from the shed.

Conclusion

I am committed to ensuring that the proposed shed enhances both my property and the local environment. By replicating a design that is already common on our street, I believe the shed will blend seamlessly with the neighborhood's character.

Biodiversity net gain

Paragraph 13 of Schedule 7A of the Town and Country Planning Act 1990 sets out that every planning permission granted for the development of land in England shall be deemed to have been granted subject to the 'biodiversity gain condition' requiring development to achieve a net gain of 10% of biodiversity value.

This is subject to exemptions, an exemption applies in relation to planning permission for a development which is the subject of a householder application, within the meaning of article 2(1) of the Town and Country Planning (Development Management Procedure) (England) Order (2015)*.

Applicants for planning permission are required to make a statement as to whether they believe the biodiversity gain condition will apply if permission is granted, please confirm:

It is my belief that if permission is granted for the development to which this application relates the biodiversity gain condition would not apply

*A 'householder application' means an application for planning permission for development for an existing dwellinghouse, or development within the curtilage of such a dwellinghouse for any purpose incidental to the enjoyment of the dwellinghouse which is not an application for change of use or an application to change the number of dwellings in a building.
