Comments

Type of comment: Support the proposal

Comment: I support the application as the tree roots clearly contributed to the instability of the original wall. Such that its vertical alignment was outside past and current safety limits and such that it had to be demolished to permit the building of a new conforming wall. GPR Surveys show that root mass from the specific trees the application applies to extend under some Dorchester Mews Car Port and Garage Structures and have damaged and continue to damage the drainage and pavements of these.
