Comment: The application fails to correctly identify that a tree is in the direct and immediate proximity of the works and likely to be affected by the works.

In the event that the garden wall adjoining 45 Ormond crescent is demolished, shrubs and plants will be affected. Again the application submitted incorrectly identifies that they will not be cut or pruned.

Further detail is required as to the full extent of the works by way of a detailed method statement with accompanying drawings and sketches.

The planning application cannot be considered until all this information is provided and we have had time to consider it.

If the garden wall adjoining 45 Ormond Crescent is to be replaced, further details are required as to what materials are going to be used. Past and current experience is that of breeze blocks and unfinished surfaces facing our property. This cannot be allowed to happen again.

We object to the adjoining garden wall being altered in any way.
