Comments

Type of comment: Make a general observation

Comment: Whilst the loft plan and rear elevation show the widened dormer to the rear, the side elevations do not. Perhaps because chimneys are obscuring it on one side?

In any event it would be useful to see what that would look like on the side elevations, even if as a dotted line, as I think the Planning officer might agree that the dormer wrapping around the hipped roof may appear over dominant, top heavy and potentially bulky.
